

A Level 2013 Zimsec Maths Papers

As recognized, adventure as without difficulty as experience virtually lesson, amusement, as with ease as covenant can be gotten by just checking out a ebook **A Level 2013 Zimsec Maths Papers** furthermore it is not directly done, you could tolerate even more not far off from this life, a propos the world.

We allow you this proper as capably as easy habit to acquire those all. We provide A Level 2013 Zimsec Maths Papers and numerous ebook collections from fictions to scientific research in any way. in the middle of them is this A Level 2013 Zimsec Maths Papers that can be your partner.

Education and Development in Zimbabwe Edward Shizha 2012-01-01 The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia

World Migration Report 2020 United Nations 2019-11-27 Since 2000, IOM has been

producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Modular Mathematics Keith Pledger 2006-10-27 The best preparation for the two-tier modular specification and additional support for the 2007 specification (2381)With ten year's experience of publishing for Edexcel Mathematics and as a preferred partner of Edexcel, we can offer the best option for the 2006 two-tier modular specification. * Free booklet containing new examination practice papers and answers for the new Unit 2 exam papers: Stage 1 and 2. * Building on the success of our existing modular series, we can offer teachers outstanding new resources for the 2006 two-tier specification that are completely different and up-to-date. * Separate tiered Student Books for units 1, 2 and 3 are fully blended with Teaching and Learning Software enabling teacher to deliver interactive lessons. * Each Student Book is delivered in colour giving clarity to different concepts through artwork and diagrams. * Concentrated examples, practice exercises and examiners tips ensure students are fully prepared for their exams. * An experienced author team, including Senior Examiners, means teachers can trust that the new specification is covered to ensure exam success.

Alan Turing: His Work and Impact S. Barry Cooper 2013-03-18 In this 2013 winner of the prestigious R.R. Hawkins Award from the Association of American Publishers, as well as the 2013 PROSE Awards for Mathematics and Best in Physical Sciences & Mathematics, also from the AAP, readers will find many of the most significant contributions from the four-volume set of the Collected Works of A. M. Turing. These contributions, together with commentaries from current experts in a wide spectrum of fields and backgrounds, provide insight on the significance and contemporary impact of Alan Turing's work. Offering a more modern perspective than anything currently available, Alan Turing: His Work and Impact gives wide coverage of the many ways in which Turing's scientific endeavors have impacted current research and understanding of the world. His pivotal writings on subjects including computing, artificial intelligence, cryptography, morphogenesis, and more display continued relevance and insight into today's scientific and technological landscape. This collection provides a great service to researchers, but is also an approachable entry point for readers with limited training in the science, but an urge to learn more about the details of Turing's work. 2013 winner

of the prestigious R.R. Hawkins Award from the Association of American Publishers, as well as the 2013 PROSE Awards for Mathematics and Best in Physical Sciences & Mathematics, also from the AAP Named a 2013 Notable Computer Book in Computing Milieux by Computing Reviews Affordable, key collection of the most significant papers by A.M. Turing Commentary explaining the significance of each seminal paper by preeminent leaders in the field Additional resources available online
GCE O Level Examination Past Papers with Answer Guides: Maths India Edition
Cambridge International Examinations 2004-03-03 These collections of the official past papers of the GCE O Level Examinations from the University of Cambridge International Examinations has been developed for students of GCE O level. These books will act as tools for preparation and revision for students. These books have an edited Answer Guide for each paper based on the marks scheme written by CIE Principal

Gender Equality, Poverty and Economic Growth 2007

Restoring the Educational Dream. Rethinking Educational Transformation in Zimbabwe Shizha, Edward 2013-12-07 The role of education in human well being and social development cannot be overestimated. After a number of highly commendable policies on education in the first decade of independence, the education system in Zimbabwe has taken a tumble that needs both examining and rectifying. This volume analyses the challenges facing the education system in Zimbabwe and explores and scrutinises theoretical and practical possibilities for restoring the educational dream that was initiated at independence in 1980. The book is targeted at academics, scholars, college and university students, policy makers and other stakeholders and advocates a multi-pronged approach that must involve all stakeholders if educational retransformation, reconstruction and restoration are to be achieved. The authors provide a range of recommendations for a project that would restore the educational dream in Zimbabwe.

Knowledge for a Sustainable World Tor Halvorsen 2015-12-07 The search for answers to the issue of global sustainability has become increasingly urgent. In the context of higher education, many universities and academics are seeking new insights that can shift our dependence on ways of living that rely on the exploitation of so many and the degradation of so much of our planet. This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. Universities in the southern African and Nordic regions that are not yet members are encouraged to join.

5 Steps to a 5 500 AP English Literature Questions to Know By Test Day Shveta Verma Miller 2011-01-07 Organized for easy reference and crucial practice, coverage of all the essential topics presented as 500 AP-style questions with detailed answer explanations 5 Steps to a 5: 500 AP English Literature Questions to Know by Test Day is tailored to meet your study needs—whether you’ve left it to the last minute to prepare or you have been studying for months. You will benefit from going over the questions written to parallel the topic, format, and degree of difficulty of the questions contained in the AP exam, accompanied by answers with comprehensive explanations. Features: 500 AP-style questions and answers referenced to core AP materials Review explanations for right and wrong answers Additional online practice Close simulations of the real AP exams Updated material reflects the latest tests Online practice exercises

World Social Report 2020 Department of Economic and Social Affairs 2020-02-14 This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

A-Level Chemistry Eileen Ramsden 2020-10-08 This highly regarded textbook covers all the main A Level Chemistry specifications.

Economic Growth and Poverty Reduction in Sub-Saharan Africa Andrew McKay 2015 While Sub-Saharan Africa has undergone an important growth recovery, of more interest is the impact of this on the conditions of those living on the continent. This book reviews many of the issues, which are particularly important in making economic growth more effective in reducing poverty. These include the extent to which agriculture, especially small-scale agriculture, shares in this growth; the extent of employment creation associated with growth; the nature of industrialization accompanying growth; and the impact of globalization. The volume surveys the risks and opportunities in each of these areas, with a view to understanding how growth can be associated with a better record of poverty reduction.

Mathematics Education in Singapore Tin Lam Toh 2019-02-07 This book provides a one-stop resource for mathematics educators, policy makers and all who are interested in learning more about the why, what and how of mathematics education in Singapore. The content is organized according to three significant and closely interrelated components: the Singapore mathematics curriculum, mathematics teacher education and professional development, and learners in Singapore mathematics

classrooms. Written by leading researchers with an intimate understanding of Singapore mathematics education, this up-to-date book reports the latest trends in Singapore mathematics classrooms, including mathematical modelling and problem solving in the real-world context.

Emerging Market Heterogeneity Mr. Zhongxia Zhang 2015-07-15 This paper studies growth patterns in Emerging Market Economies (EMs) from the perspective on clusters and taxonomies. First, it documents developments over the past five decades in EMs and uses a cluster analysis to better understand convergence and the investment-growth nexus. Second, it looks at the performance of EMs since 2000 and develops a taxonomy to classify countries according to their factor endowments as well as their real and financial external linkages. The taxonomy offers insights on growth dynamics pre and post the global financial crisis. Results highlight the high degree of heterogeneity in EMs and the need for more granular and targeted near and long-term policy advice.

Finance and Development, December 2013 International Monetary Fund. External Relations Dept. 2013-11-25 For the latest thinking about the international financial system, monetary policy, economic development, poverty reduction, and other critical issues, subscribe to Finance & Development (F&D). This lively quarterly magazine brings you in-depth analyses of these and other subjects by the IMF's own staff as well as by prominent international experts. Articles are written for lay readers who want to enrich their understanding of the workings of the global economy and the policies and activities of the IMF.

The Routledge Handbook of Green Social Work Lena Dominelli 2018-03-28 Green social work espouses a holistic approach to all peoples and other living things – plants and animals, and the physical ecosystem; emphasises the relational nature of all its constituent parts; and redefines the duty to care for and about others as one that includes the duty to care for and about planet earth. By acknowledging the interdependency of all living things it allows for the inclusion of all systems and institutions in its remit, including both (hu)man-made and natural disasters arising from the (hu)made ones of poverty to chemical pollution of the earth's land, waters and soils and climate change, to the natural hazards like earthquakes and volcanoes which turn to disasters through human (in)action. Green social work's value system is also one that favours equality, social inclusion, the equitable distribution of resources, and a rights-based approach to meeting people's needs to live in an ethical and sustainable manner. Responding to these issues is one of the biggest challenges facing social workers in the twenty-first century which this Handbook is intended to address. Through providing the theories, practices, policies, knowledge and skills required to act responsibly in responding to the diverse disasters that threaten to endanger all living things and planet earth itself, this green social work handbook will be required reading for all social work students, academics and professionals, as well as those working in the fields of community development and disaster management.

Ending the Torment United Nations Office of the Special Representative of the Secretary-General on Violence against Children 2016-09-23 Eighteen experts in the field of bullying and cyberbullying and the SRSG on Violence against Children, have written a unique contribution from their specific area of expertise, addressing bullying and cyberbullying. Starting with a human rights foundation and children participation, it is followed by examples that show different experiences in developing policies and legislation, including specific dimensions and vulnerable groups to be kept in mind. The publication then provides different examples of the very few evidence-based interventions that have proven to work in the prevention and respond to bullying and cyberbullying in the school and its surroundings, decreasing its prevalence. The publication ends with information on global data and the need for better collection and analysis methodologies; a section addressing some of the specific aspects presented by cyberbullying and the use of information and communication technologies, and ends with an overview of prevalence of bullying and cyberbullying in different regions in the world.

Daily Language Review Grade 5 Evan-Moor Educational Publishers 1998-03 This book includes Monday to Friday lessons for each day of a 36-week school year and short daily lessons. The Monday to Thursday lessons include two sentences to edit, including corrections in punctuation, capitalization, spelling, grammar, and vocabulary and three items practicing a variety of language and reading skills. Friday practice cycles through five formats: language usage, identifying and correcting mistakes, combining sentences, choosing reference materials and figurative speech (similes, metaphors). The pages are reproducible and the book includes a skills list and answer keys.

Limits to Climate Change Adaptation Walter Leal Filho 2017-11-15 This book sheds new light on the limits of adaptation to anthropogenic climate change. The respective chapters demonstrate the variety of and interconnections between factors that together constitute the constraints on adaptation. The book pays special attention to evidence that illustrates how and where such limits have become apparent or are in the process of establishing themselves, and which indicates future trends and contexts that might prove helpful in understanding adaptation limits. In particular, the book provides an overview of the most important challenges and opportunities regarding adaptation limits at different temporal, jurisdictional, and spatial scales, while also highlighting case studies, projects and best practices that show how they may be addressed. The book presents innovative multi-disciplinary research and gathers evidence from various countries, sectors and regions, the goal being to advance our understanding of the limits to adaptation and ways to overcome or modify them.

Klara and the Sun Kazuo Ishiguro 2021 From her place in the store, Klara, an Artificial Friend with outstanding observational qualities, watches carefully the behaviour of those who come in to browse, and of those who pass in the street outside. She remains hopeful a customer will soon choose her, but when the possibility emerges that her circumstances may change for ever, Klara is warned not to invest too much in the promises of humans. In 'Klara and the Sun', Kazuo Ishiguro looks at our rapidly-changing modern world through the eyes of an unforgettable narrator to explore a fundamental question: what does it mean to love?

Trade in Zimbabwe Richard Newfarmer 2015-05-26 In Zimbabwe, trade has been a driver of economic growth, rising incomes, and progressive empowerment of Zimbabweans through rising standards of living and the promise of better jobs. Since 1980, through good years and bad years, increases in exports have been

positively associated with increases in national income. Zimbabwe's location and resource base, together with a low-cost but relatively well educated labor force, have endowed it with a naturally high trade ratio built on a diversified base that facilitates using trade as an engine of growth. While trade volumes have rebounded smartly from the deep recession of 2007-2008, these do not offset other worrisome longer-term trends:

- Export growth during the last decade has been lacklustre and failed to drive high growth.
- Agricultural exports, other than tobacco, have lost their once dominant role in the region, and are no longer a source of diversification.
- Manufacturing has withered in a continuing secular decline.

Zimbabwe's export basket has become less diversified and more dependent on a narrow range of mineral and, to a lesser extent, agricultural products. In short, exports have become less diversified, less-technologically sophisticated, and less labor-intensive - and ever more dependent on a few large mining activities to provide foreign exchange and employment. This report traces the roots of this poor performance to several policy issues: poor predictability of macroeconomic policy and economic governance has created an unfavorable climate for private investment and trade; a tariff structure that dampens export profitability; industrial policies - indigenization policy in particular - that undermine investor confidence and inhibits private investment; and finally, competition-limiting policies toward services that limit connectivity of Zimbabweans and raise trade costs. The good news arising from the study is that the remedies for these policy shortcomings lie in Zimbabwean hands. If the government were to adopt reforms that reconfigure economy-wide incentives and trade and industrial policies, it could promote sustained growth, economic diversification and empowerment of poor people.

The World of Science Education Femi S. Otulaja 2017-09-12 Each volume in the 7-volume series The World of Science Education reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program. The reviews of the research situate what has been accomplished within a given field in Sub-Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories – focusing the changing façade of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing and what might be done next.

World Livestock 2013 Food and Agriculture Organization of the United Nations 2018-08-22 The World Livestock 2013: Changing disease landscapes looks at the evidence of changing disease dynamics involving livestock and explores three key areas: the Pressure, including drivers and risk factors that contribute to disease emergence, spread and persistence; the State, describing the disease dynamics that result from the Pressure and their subsequent impact; and the Response, required both to adapt and improve the State and to mitigate the Pressure. The report argues that a comprehensive approach for the promotion of global health is needed to face the complexities of the changing disease landscapes, giving greater emphasis on agro-ecological resilience, protection of biodiversity and efficient use of natural resources to ensure safer food supply chains, particularly in areas worst afflicted by poverty and animal diseases. Speeding up response times by early detection and reaction – including improved policies that address disease

drivers – is key. Forging a safer, healthier world requires engagement in the One Health approach, which involves all relevant actors and disciplines spanning animal, human and environmental health sectors.

Edexcel Linear 2010-04-19 Collins New GCSE Maths Edexcel Linear Teacher's Pack Higher 1 contains everything you need to deliver effective lessons in mathematics with confidence for students working at Grades D to A*. Fully matched to Edexcel's new GCSE Maths Linear specification, these teacher resources offer well-differentiated lesson plans and additional support. The Teacher's Pack allows you to:

- * Capture the essence of chapters at a glance with chapter overviews
- * Easily access learning objectives and references to exam board specifications, KS4 Programme of Study, Functional Skills Standards and Personal Learning and Thinking Skills (PLTS) for each chapter
- * Link maths concepts and help students to access functional and problem-solving scenarios
- * Raise standards by providing the right level of progression for every student by using the well-differentiated lesson plans
- * Involve the whole class in engaging activities and discussions using the Starter
- * Lead students into the main concepts and exercises with the Main Lesson Activity
- * Consolidate and summarise learning using the Plenary
- * Quickly access the answers to all questions in the corresponding Student Book and Homework Book
- * Plan ahead and save time using the ready-made Scheme of Work
- * Customise your lessons using Lesson Plans in Word format on the CD-Rom

'Progress' in Zimbabwe? David Moore 2013-09-13 Zimbabwe's severe crisis - and a possible way out of it with a transitional government, and the new era for which it prepares the ground - demands a coherent scholarly response. 'Progress' can be employed as an organising theme across many disciplinary approaches to Zimbabwe's societal devastation. At wider levels too, the concept of progress is fitting. It underpins 'modern', 'liberal' and 'radical' perspectives of development pervading the social sciences and humanities. Yet perceptions of 'progress' are subject increasingly to intensive critical inquiry. Their gruesome end is signified in the political projects of Robert Mugabe and ZANU-PF. John Gray's Black Mass: Apocalyptic Religion and the Death of Utopia indicates this. It is expected that participants will engage directly in debates about how the idea of 'progress' has informed their disciplines - from political science and history to labour and agrarian studies, and then relate these arguments to the Zimbabwean case in general and their research in particular. This book was published as a special issue of the Journal of Contemporary African Studies.

Zimbabwe's Trajectory V. Masunungure 2020-11-11 At Independence in 1980, Julius Nyerere called Zimbabwe 'the jewel of Africa', and cautioned its new leaders not to tarnish it. Tragically, they paid no heed to Africa's esteemed elder statesmen. Arguably - and only if one ignores the carnage of Gukurahundi - the first decade was a developmental one, with resources being used prudently to benefit the formerly disadvantaged majority population. However, the 1990s witnessed a transition from a developmental to a predatory leadership which saw Zimbabwe cross the millennial line in crisis, where it has remained ever since. While many African countries have moved forward over the last three decades, Zimbabwe has gone relentlessly backwards, save for the four-year interregnum of the tripartite coalition government, 2009-2013. Virtually all development indicators point in the wrong direction and the crisis of poverty, unemployment, and the erosion of health, education and other public goods continues unabated. The imperatives of political survival and power politics supersede those of sound economics and public welfare. Moreover, unless good politics are conjoined with a sound people-first policy, the country will continue sliding downhill. Zimbabwe's Trajectory

tells the story of the country's post-independence dynamics and its recent descent into becoming one of the three most unhappy countries in the world.

Minerals Yearbook Geological Survey 2019-01-31 This volume, covering metals and minerals, contains chapters on approximately 90 commodities. In addition, this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals Information, plus a statistical summary.

Strengthening and harmonizing food policy systems to achieve food security Babu, Suresh Chandra 2017-02-15 Understanding how various entities in a policy system at the national level can contribute to improved use of evidence in policy making. Yet little research has focused in developing countries on how various actors and players in a policy system work together to achieve a set of policy goals. In this paper, we study the factors contributing to the effectiveness of a policy system. The process of policy design, adoption, implementation, and refinement requires an effective policy system as well as a capacitated and supportive institutional structure. External actors both through technical and financial assistance often support policy systems in developing countries. Poor coordination and harmonization of such assistance among various actors and players within the country can often result in undermining the very policy systems they try to strengthen. This is typical in the African agricultural development process. In this paper, we develop a conceptual framework for understanding the policy and institutional architecture of food and agriculture policy system and for improving the coordination and harmonization of the roles of policy actors and players. Applying the framework to Ghana, we map and analyze the organizational contributions of various actors and their functional characteristics. We show how such analysis can aid various policy actors in setting priorities and strategies for increasing their capacity and the effectiveness of their roles. Finally, we draw lessons for strengthening the food policy systems in developing countries through effective coordination among local and external actors.

Transitional Justice and Socio-Economic Rights in Zimbabwe Prosper Maguchu 2019-07-26 This book addresses the issue of corruption as a socio-economic rights concern at a national level. Zimbabwe's widespread corruption inhibited its development in all aspects. It weakened institutions, especially those called upon to arbitrate political and economic contests, leading to potential human rights violations. However, Zimbabwe saw a change of government in November 2017. Due to this, there seemed to be an opening to work towards reform in relation to the anti-corruption architecture. Specifically, the new era provides an opportunity to review how accountability mechanisms (including but not limited to amnesties, truth commissions, institutional reforms and prosecutions) can address corruption as a socio-economic rights violation. As the new government still tries to address competing priorities, many moving parts and various matrixes, this volume in the

International Criminal Justice Series provides a timely frame for revisiting the debate and developing the strategic thinking regarding transitional justice options in Zimbabwe. It will be of great interest to practitioners, policy makers, scholars and students in the fields of anti-corruption, socio-economic and human rights, and transitional justice. Prosper Maguchu is Visiting Assistant Professor at the Centre for the Politics of Transnational Law of the Vrije Universiteit Amsterdam, The Netherlands.

Validating Technological Innovation David Coniam 2016-04-02 This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Global Study on Homicide 2013 United Nations 2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

Livelihoods of Ethnic Minorities in Rural Zimbabwe Kirk Helliker

Mapping research and innovation in the Republic of Zimbabwe Lemarchand, Guillermo A. 2014-08-11

Pocket Book of Hospital Care for Children World Health Organization 2013 The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

The Theory of Political Economy William Stanley Jevons 1871
