**Australia, Migration and Empire** Philip Payton

2019-08-12 This edited collection explores how migrants played a major role in the creation and settlement of the British Empire, by focusing on a series of Australian case studies. Despite their shared experiences of migration and settlement, migrants

nonetheless often exhibited distinctive cultural identities, which could be deployed for advantage. Migration established global mobility as a defining feature of the Empire. Ethnicity, class and gender were often powerful determinants of migrant attitudes and behaviour. This volume addresses these considerations, illuminating the complexity and diversity of the British Empire's global immigration story. Since 1788, the propensity of the populations of Britain and Ireland to immigrate to Australia varied widely, but what this volume highlights is their remarkable diversity in character and impact. The book also presents the opportunities that existed for other immigrant groups to demonstrate their loyalty as members of the (white) Australian community, along with notable exceptions which demonstrated the limits of this inclusivity.

**Australian Origins** Victoria Macleay 2012 "This is the story of the origins of all Australians & of the people who have immigrated to this continent to make it what it is today. From the very first immigrants more than 40 000 years ago to those who arrived in recent years, we follow the people who came from around the world to make Australia their home and examine the pressures that led to their moves. There are details of each country and its relationship with Australia, as well as a brief national history, to put the immigration patterns into context. Here are the moves that people made that created modern Australia and gave it the character that makes this nation unique."

role in global evolution. Renowned for its gallery of unusual mammals, Australia is also a land of extraordinary birds. But unlike the mammals, the birds of Australia flew beyond the continent's boundaries and around the globe many millions of years ago. This eye-opening book tells the dynamic but little-known story of how Australia provided the world with songbirds and parrots, among other bird groups, why Australian birds wield surprising ecological power, how Australia became a major evolutionary center, and why scientific biases have hindered recognition of these discoveries. From violent, swooping magpies to tool-making cockatoos, Australia's birds are strikingly different from birds of other lands—often more intelligent and aggressive, often larger and longer-lived. Tim Low, a renowned biologist with a rare storytelling gift, here presents the amazing

evolutionary history of Australia's birds. The story of the birds, it turns out, is inseparable from the story of the continent itself and also the people who inhabit it.

### **Napoleon's Australia**

Terry Smyth 2018-08-20 In the northern winter of 1814, a French armada set sail for New South Wales. The Armada's mission was the invasion of Sydney, and its inspiration and its fate were interwoven with one of history's greatest love stories--Napoleon and Josephine. The Empress Josephine was fascinated by all things Australian. In the gardens of her grand estate, Malmaison, she kept kangaroos, emus, black swans, and other Australian animals, along with hundreds of native plants brought back by French explorers in peacetime. And even when war raged between France and Britain, ships known to be carrying Australian flora and fauna for "Josephine's Ark" were

given safe passage. Napoleon, too, had an abiding interest in Australia, but for quite different reasons. What Britain and its Australian colonies did not know was that French explorers visiting these shores, purporting to be naturalists on scientific expeditions, were in fact spies, gathering vital information on the colony's defenses. It was ripe for the picking. The conquest of Australia was on Bonaparte's agenda for world domination, and detailed plans had been made for the invasion and for how French Australia would be governed. How it all came together and how it fell apart is a remarkable tale--history with an element of the "What if?" No less remarkable is how the tempestuous relationship between Napoleon and his empress affected the fate of the Great Southern Land. Today, on the island of Saint Helena, where Napoleon was exiled after his defeat

at Waterloo, Sydney golden wattle grows wild. Napoleon planted it there to remind him of Josephine.

### **Advance Australia ...**

**Where?** Hugh Mackay 2011  
In Advance Australia Where?  
Hugh Mackay, our most highly respected social researcher, takes a long hard look at our society in the 21st century. While we enjoy unprecedented levels of prosperity and the promise of more to come, we are still battling an epidemic of anxiety and depression, taking on record levels of debt, and yearning for a deeper sense of meaning in our lives. While many Australians complain about feeling powerless and isolated, Mackay sees some encouraging signs that we are learning how to absorb the impact of the revolutionary changes in our way of life. This fully updated edition examines

Australia in the wake of the federal election of 2007, and explores the issues that are now confronting us.

**Australia—Where to Now?** Ron Fraser  
2013-10-17 Anglo-Saxons are a forgetful people. It was ever so, from their beginnings as a collection of tribes, morphing over time into the most influential of nations on Earth. So it is that in the great debate over whether or not Australia should become a republic, the true origins of the nation—the real foundation of its

greatness—are seldom spoken of. In this booklet: • A Nation—Meant to Be • Boom and Bust • Trailing Behind the Trend • Sorry for What? • Savages on the Fringe • Generation Gap • Here's to the Heroes • Can Australia Defend Itself? • Detaching From History • Final Warning This ebook is offered completely free of charge by the Philadelphia Church of God. The Aborigines of Western Australia Albert F. Calvert  
2014-09-17 "Among the rudest tribes of men, inhabitants of the wild forests and deserts, dependent for their food and clothing on the accidental

produce of the earth or spoils of the chase, a form of skull is prevalent, which is termed prognathous, indicating an extension forward of the jaws. The facial angle peculiar to this formation is low, and is strongly developed among the Alfurian or Australian races. They probably spring from a common source; and the Rev. William Ridley draws attention to the interesting fact that the blacks themselves always have in idea that their ancestors came from the north. Then the current of migration has been ever towards the south and west, and the natives of the north-eastern corner call it "Kai Dowdai" or Little Country. This seems strange when New Guinea is known to them as "Muggi Dowdai" or Great Country. The anomaly is accounted for by their ignorance of the extent of country they inhabit. To those living near Cape York, and passing to and fro across the strait dividing

New Holland from New Guinea, the low narrow promontory would seem insignificant compared with the great mountain ranges of the latter. Then again there is a tradition among some tribes that their first parents landed on the North West Corner from Java. All this, however, is at the best but wild conjecture. The real source from which the Aborigines of Australia originally came is one of those mysteries buried in the impenetrable depths of an unwritten past." The Great Power Struggle  
for Australia 1900-1945

Andrew Taylor Ross

2019-12-03 With the approach of the Second World War, Australia's economic struggles with the Great Powers declined, and were replaced with military struggles with the Axis Powers. Australian secondary industry had been seen by the British Board of Trade as a direct threat to British exports to Australia. It was now seen by the ascendant British Admiralty, War, Air and Supply Departments as a positive asset to the defence of the British Empire. This provided a window of opportunity to consolidate Australian secondary industry and to expose it to the latest technologies. However, the production of munitions in Australia was disrupted by the Australian Armed

Services attempting to take control of the organisation of industry for war. After nine months of confusion, the Department of Munitions was formed with the power to direct all industry without the interference of the Armed Services. Production of established munitions moved ahead with great speed, but the design of fighter aircraft and armoured fighting vehicles floundered because the Air Force and the Army were unable to define competently the weapons that they wanted in these areas. Eventually, Australian designed weapons did emerge in these areas, which were better than Japanese equivalents, but they were not always up to the standards set by the USA and Britain. One exception was the Thunderbolt Tank which turned out to be the most powerful Western Allied tank until the last weeks of the War in Europe. By early 1942, Australian industry

had produced enough equipment and munitions to arm a force of eight divisions. These forces had better weapons than the Japanese, and in most cases, were more numerous than for Japanese divisions. The size of force that the Japanese calculated they would need to overcome the Australian divisions, was larger than the Japanese could supply without weakening the Chinese front, and was too large for Japanese shipping to transport without crippling Japanese industry through lack of imported materials. This was the real reason why the Japanese chose not to invade Australia. The situation in the air was no better for the Japanese because the Australian designed and manufactured Boomerang fighter aircraft was capable of matching the Japanese Zero fighter, when operating within the Australian East coast radar network. This was made up of radars designed and

made in Australia. The US Navy victory at Midway, allowed secure communications to be established to Papua/New Guinea. This enabled the transfer of Australian military power from continental Australia. This saw the beginning of brutal jungle warfare between Japanese and Australian forces. But the Australians adapted more comprehensively. Australian science and industry started to make a completely new suite of equipments and munitions so that they could withstand the deleterious jungle conditions. This also included food and clothing, and medical supplies. In contrast, Japanese equipment, munitions, food and clothing suffered great loss from jungle organisms. The Australian advantages eventually allowed them to sweep the Japanese forces aside, with very low casualties, while inflicting heavy loss on the Japanese. Australian battlefield

dominance was never acknowledged by General MacArthur, who insisted in describing their successes as Allied victories, while describing American successes as US victories. In fact, MacArthur's victories until well into 1944, were nearly all achieved by the very experienced Australians. MacArthur's dependence on the Australians went even further than this. Australia supplied enormous quantities of materials and equipments to the US forces in the South West Pacific. Most of the food consumed by the one million Americans in the South West Pacific came from Australia. President Truman pointed out that Australia supplied, per head of population, as much support as the much larger USA. No other Allied country came close to this level of support.

## **The Story of Australia**

Louise C Johnson

2021-09-03 The Story of Australia provides a fresh, engaging and comprehensive introduction to Australia's history and geography. An island continent with distinct physical features, Australia is home to the most enduring Indigenous cultures on the planet. In the late eighteenth century newcomers from distant worlds brought great change. Since that time, Australia has been shaped by many peoples with competing visions of what the future might hold. This new history of Australia integrates a rich body of scholarship from many disciplines, drawing upon maps, novels, poetry, art, music, diaries and letters, government and scientific reports, newspapers, architecture and the land itself, engaging with Australia in its historical, geographical, national and global contexts. It pays

particular attention to women and Indigenous Australians, as well as exploring key themes including invasion/colonisation, land use, urbanisation, war, migration, suburbia and social movements for change. Elegantly written, readers will enjoy Australia's story from its origins to the present as the nation seeks to resolve tensions between Indigenous dispossession, British tradition and multicultural diversity while finding its place in an Asian region and dealing with global challenges like climate change. It is an ideal text for students, academics and general readers with an interest in Australian history, geography, politics and culture.

**Captured Lives** Peter

Monteath 2018-08-01

Captured Lives peers behind the barbed wire drawn around people deemed threats to Australia's security during the two world wars. Civilians from

enemy nations, even if born in Australia, were subjects of suspicion and locked away in internment camps.

Prisoners-of-war were shipped from the other side of the world and shut away in camps in country

Australia. No matter how unjust their internment or how severe the privations, most internees and POWs worked out ways to relieve their discomfort, physical and mental, and their boredom. Internees devoted

their time to creative pursuits like theatre, musical ensembles, art and photography, while others involved themselves in sporting activities, gardening or studying.

Captured Lives mentions over 30 of the main camps that were spread across Australia during the two world wars. Included are sketches, watercolours and photographs made by internees serve as references of the conditions and life in the camps from an insider's perspective.

**No Friend But the Mountains** Behrouz

Boochani 2018-07-31

WINNER OF THE VICTORIAN PREMIER'S LITERARY PRIZE FOR LITERATURE AND FOR NON-FICTION 2019 Where have I come from? From the land of rivers, the land of waterfalls, the land of ancient chants, the land of mountains... In 2013, Kurdish journalist Behrouz Boochani was illegally detained on Manus Island. People would run to the mountains to escape the warplanes and found asylum within their chestnut forests... This book is the result. Laboriously tapped out on a mobile phone and translated from the Farsi. It is a voice of witness, an act of survival. A lyric first-hand account. A cry of resistance. A vivid portrait through six years of incarceration and exile. Do Kurds have any friends other than the mountains? WINNER OF THE NSW PREMIER'S AWARD
