"He vows to endure to be burned, to be bound, to be beaten, and to be killed by the sword." - The gladiator's oath, according to Petronius in the Satyricon. Gladiators are somewhat synonymous with ancient Rome, and even thousands of years after they performed on the sands, when people are asked about Roman culture, many think about and refer to the bloody spectacles of men fighting to the death in the arena. Gladiatorial combat is often regarded as barbaric, and most find it very difficult to comprehend how people could have enjoyed watching something so violent, but nevertheless, the spectacle still intrigues and fascinates people today, whether in movies like Gladiator or television shows about Spartacus. Gladiatorial combat traces its origins back to the early Republican period from the 5th-3rd century B.C., but it's still unclear where these combats first appeared. Credit has been given to both the Etruscans in northern Italy and the Campanians in southern Italy, though the first recorded gladiatorial combat occurred in the 3rd century B.C. at the funeral of D. Junius Brutus Pera. His sons organized a combat between three different pairs of gladiators who fought at their father's grave, but exactly what these first gladiatorial combats were supposed to represent remains unclear. Some believe that the spilling of human blood was a way of offering a sacrifice to the dead, while others suggest that the contests themselves were a funeral offering in honor of the dead. Gladiatorial combat began in the Republican period and was associated with death and burial, but due to its popularity it became an organized form of entertainment in the Imperial Age, and even as the gladiators were considered low class, they were also admired, leading to some Roman men and women volunteering to become gladiators. Whatever the original role of gladiatorial combats, they thrilled Roman audiences for many centuries. Each match usually pitted one type of gladiator against a different type of gladiator, with each having their own kind of armor, weaponry and fighting style. For example, the retiarius was a gladiator that used a net, dagger and trident as his offensive weapons, while only wearing a protective guard over his left arm for protection. The retiarius would typically fight against the secutor, a gladiator armed with a sword, large shield, helmet and protective covering on his right arm and left leg. Therefore, a retiarius sacrificed armor for quickness in battle, while the secutor did the opposite. Although people often think of gladiators fighting to the death, the outcome of gladiatorial combats was not always fatal for one of the participants. If a gladiator fought well, the sponsor of the show could spare him, particularly if the crowd desired it. The fact that the outcome of matches was never the same and the crowd could help determine the result of the match certainly added to the Roman public's pleasure, making it a lot less surprising that such an abhorrent spectacle still fascinated the modern world. The Roman Gladiators: The History and Legacy of Ancient Rome's Most Famous Warriors examines the history of the gladiators and the games they participated in, explaining what life and death was like for the men who fought in Rome's most famous form of entertainment. Along with pictures depicting important people, places, and events, you will learn about gladiators like you never have before.

**Demystifying Dissertation Writing** Peg Boyle Single 2011-06-30 Research shows that five strategies correlate with the successful completion of a dissertation: Establishing a consistent writing routine Working with a support group Consulting your advisor Understanding your committee's expectations Setting a realistic and timely schedule Building on these insights, this book is for anyone who needs help in preparing for, organizing, planning, scheduling, and writing the longest sustained writing project they have encountered, particularly if he or she is not receiving sufficient guidance about the process, but also for anyone looking to boost his or her writing productivity. The author uncovers much tacit knowledge, provides advice on working with dissertation advisors and committee members, presents proven techniques for the prewriting and writing stages of the dissertation, sets out a system for keeping on schedule, and advocates enlisting peer support. As Peg Boyle Single states, "my goal is quite simple and straightforward: for you to experience greater efficiency and enjoyment while writing. If you experience anxiety, blocking, impatience, perfectionism or procrastination when you write, then this system is for you. I want you to be able to complete your writing so that you can move on with the rest of your life." Few scholars, let alone graduate students, have been taught habits of writing fluency and productivity. The writing skills imparted by this book will not only help the reader through the dissertation writing process, but will serve her or him in whatever career she or he embarks on, given the paramount importance of written communication, especially in the academy. This book presents a system of straightforward and proven techniques that are used by productive writers, and applies them to the dissertation process. In particular, it promotes the concept of writing networks – whether writing partners or groups – to ensure that writing does not become an isolated and tortured process, while not hiding the need for persistence and sustained effort. This book is intended for graduate students and their advisers in the social sciences, the humanities, and professional fields. It can further serve as a textbook for either informal writing groups led by students or for formal writing seminars offered by departments or graduate colleges. The techniques described will help new faculty advice their students more effectively and even achieve greater fluency in their own writing.

Yet most women's stories of personal growth after motherhood tend to remain untold. As writers and mothers, Andrea Buchanan and Amy Hudock were frustrated by what they perceived as a lack of writing by mothers that captured the ambiguity, complexity, and humor of their experiences. So they decided to create the place they wanted to find, with the kind of writing they wanted to read. This unique collection
