Phyllis and Reg's dream which started
on a remote caravan site on the west
coast of Scotland. It will be enjoyed
as a story in its own right or by the
readers of Jessie's earlier novel
Camus Calling many of whom requested
that she continue the story. From the
start of the first full season as an
independent site Camus flourishes and
gains further recognition from the

continues with the dramas, humour and adventures of their latest guests including, of course, Norman, the highland cow, who remains a consistent and much loved character of the site. Jessie introduces characters inspired by real people that she has encountered on caravan sites and her experiences, of visiting much of the West Coast. Jessie's love of Scotland is reflected in Phyllis's growing passion for the Highlands. The breathtaking beauty and colours of the landscape, the wildlife and the friendliness of the people conspire to form a lasting bond. As family ties in England abate Phyllis's dream to stay gets closer still.

Acadia Trails Treatment Plan: Cultural Landscape Report for the Historic Hiking Trail System of Acadia National Park This report represents the second volume of the Cultural Landscape Report (CLR) for the Historic Hiking Trail System of Mount Desert Island. This volume focuses more specifically on the 103 marked, maintained trails within the park, which extend over 118 miles (See Appendix B). This report is the culmination of several years of research, analysis, field inventory, and documentation necessary to synthesize voluminous information about the island's extensive trail system. The intended audience for this document includes individuals

who are extremely familiar with Acadia's trails and are involved in the planning process as well as those who may be unfamiliar with the trail system and/or trail construction in general but may be involved in future trail rehabilitation efforts. As a result, this document relies heavily on graphics to complement and enhance the narrative. Numerous photographs and sketches are included to clarify the text, illustrate historic and existing conditions, and provide examples of both acceptable and unacceptable usage of specific trail features.
