La sinfonía del Universo Jaime Buhigas Tallon 2019-06-12 Este libro está dedicado a una misión inalcanzable: descubrir la música que producen los astros en su eterna danza celeste. O, dicho de otro modo: averiguar los profundos secretos matemáticos que guardan las claves de la belleza y la armonía en el Universo. Todos nuestros conocimientos como seres humanos serán necesarios para la osada empresa: poesía, arte, mitología filosofía..., pero también astronomía, física, matemáticas... Aprendiendo de los grandes sabios de la historia que dedicaron su vida a esta aventura imposible —Pitágoras, Platón, Ptolomeo, Kepler, Newton...—, nos sumergiremos en los conceptos simbólicos que nos brinda el arte de la geometría sagrada, para entender (un poco) y experimentar (mucho más) la grandeza de las leyes numéricas que gobiernan el orden sutil y delicioso de nuestra Creación. Desde la construcción de las escalas musicales y los ritmos poéticos, hasta las mismas proporciones del canon humano, veremos que la máxima pitagórica: «Todo está hecho según el número», es una verdad incuestionable.

Echi di Le Corbusier in Abruzzo Raffaele Giannantonio

2016-02-03T00:00:00+01:00 Collana Presenze diretta da Sandro Benedetti Negli anni Sessanta a Roccaraso, fra le montagne d'Abruzzo, Vincenzo Monaco progetta una piccola chiesa il cui rimando a Le Corbusier risulta evidente al primo sguardo. Non si tratta di un episodio casuale né di una citazione isolata in quanto lo stesso Monaco assieme ad Amedeo Luccichenti cita manieristicamente la poetica del Maestro in altre occasioni, a partire dalla villa alla Camilluccia costruita nell'anteguerra per la famiglia Petacci. Lo studio di Raffaele Giannantonio analizza questo percorso che trova conclusione in una delle rarissime opere d'architettura religiosa progettate da Vincenzo Monaco il quale, dopo la morte di Luccichenti, si affida alla collaborazione di Carlo Mercuri. Ad inquadrare e completare lo studio giungono gli scritti introduttivi di Maria Antonietta Crippa e Carlo Pozzi, nonché gli approfondimenti di Alessandra Pirozzi, Giovanni Mataloni e Donato Palumbo. RAFFAELE GIANNANTONIO, architetto, insegna Storia dell'Architettura presso il Dipartimento di Architettura dell'Università "G. d'Annunzio" di Chieti e Pescara. È membro del Centro di Studi per la Storia dell'Architettura. Ha svolto studi e ricerche sull'architettura italiana dalla fine dell'Ottocento alla Seconda Guerra Mondiale, tra cui il recente A Greek Revival in the Eternal City. Projects for the National Stadium in Rome 1906-11, in "The Classicist", New York, Institute of Classical Architecture & Art, n. 11/2014. Per Gangemi ha pubblicato nel 2012 "Case ed Alloggi per impiegati" in Piazza Caprera. Il contributo di Gustavo Giovannoni, in L'altra modernità nella cultura architettonica del XX secolo, a cura di Laura Marcucci.

The Divine Comedy Dante Alighieri 1989 Dante's classic is presented in the original Italian as well as in a new prose translation, and is accompanied by commentary on the poem's background and allegory.

Modern Architecture and its Representation in Colonial Eritrea Sean Anderson 2016-03-03 Modern Architecture and its Representation in Colonial Eritrea offers a critical assessment of architecture and urbanism constructed in Eritrea during the Italian colonial period spanning from 1890-1941. Drawing together imperial projects, modernist aesthetics, and fascist motives, the book examines how the merger of these three significant influences yielded a complex built environment that served to emulate, if not redefine, Italian colonial pursuits. As Italy's colonia primogenita or 'first born colony', Eritrea and its capital, Asmara, not only bore witness to the emergence of politicized interiors and international expositions, the colony became a vehicle that polarized issues of race and gender. Exploring discourses of modernity in Africa, this book moves between histories of architecture, urbanism, literature and media to describe how Eritrea and Asmara became a crucial fulcrum for Italy's ill-fated pursuits in Ethiopia and other neighboring countries. Consequently, modern architecture inscribed Eritrean subjectivities while redefining technologies that affected constructions of the colonial interior. Modern Architecture and its Representation in Colonial Eritrea demonstrates how architecture in Asmara reshaped the creation and reception of Italian East Africa.

On the Life of Galileo Stefano Gattei 2019-07-23 The first collection and translation into English of the earliest biographical accounts of Galileo's life This unique critical edition presents key early biographical accounts of the life and work of Galileo Galilei (1564-1642), written by his close contemporaries. Collected and translated into English for the first time and supplemented by an introduction and incisive annotations by Stefano Gattei, these documents paint an incomparable firsthand picture of Galileo and offer rare insights into the construction of his public image and the complex intertwining of science, religion, and politics in seventeenth-century Italy. Here in its entirety is Vincenzo Viviani's Historical Account, an extensive and influential biography of Galileo written in 1654 by his last and most devoted pupil. Viviani's text is accompanied by his "Letter to Prince Leopoldo de' Medici on the Application of Pendulum to Clocks" (1659), his 1674 description of Galileo's later works, and the long inscriptions on the façade of Viviani's Florentine palace (1702). The collection also includes the "Adulatio pernicioza," a Latin poem written in 1620 by Cardinal Maffeo Barberini—who, as Pope Urban VIII, would become Galileo's prosecutor—as well as descriptive accounts that emerged from the Roman court and contemporary European biographers. Featuring the original texts in Italian, Latin, and French with their English translations on facing pages, this invaluable book shows how Galileo's pupils, friends, and critics shaped the Galileo myth for centuries to come, and brings together in one volume the primary sources needed to understand the legendary scientist in his time.

History of Italian Philosophy Eugenio Garin 2008 This book is a treasure house of Italian philosophy. Narrating and explaining the history of Italian philosophers from the Middle Ages to the twentieth century, the author identifies the specificity, peculiarity, originality, and novelty of Italian philosophical thought in the men and women of the Renaissance. The vast intellectual output of the Renaissance can be traced back to a single philosophical stream beginning in Florence and fed by numerous converging human factors. This work offers historians and philosophers a vast survey and penetrating analysis of an intellectual tradition which has heretofore remained virtually unknown to the Anglophonic world of scholarship.

Urban Planning in Sub-Saharan Africa Carlos Nunes Silva 2015-06-03 Cities in Sub-Saharan Africa are unequally confronted with social, economic and environmental challenges, particularly those related with population growth, urban sprawl, and informality. This complex and uneven African urban condition requires an open discussion of past and current urban planning practices and future reforms. Urban Planning in Sub-Saharan Africa gives a broad perspective of the history of urban planning in Sub-Saharan Africa and a critical view of issues, problems, challenges and opportunities confronting urban policy makers. The book examines the rich variety of planning cultures in Africa, offers a unique view on the introduction and development of urban planning in Sub-Saharan Africa, and makes a significant contribution against the tendency to over-generalize Africa's urban problems and Africa's urban planning practices. Urban Planning in Sub-Saharan Africa is written for postgraduate students and advanced undergraduates, researchers, planners and other policy makers in the multidisciplinary field of Urban Planning, in particular for those working in Spatial Planning, Architecture, Geography, and History.

Culturas de Espana Carmen Pereira-Muro 2014-01-01 Taking a student-centered approach to learning, CULTURAS DE ESPAÑA, 2nd Edition truly engages students with its wealth of authentic texts and visual materials while encouraging them to think critically about the cultures of Spain. Developed for Spanish students at the fifth-semester level or higher, this insightful reader makes an excellent main text in a civilization, culture, or reading course. A departure from traditional texts, which present Spanish civilization as a neutral recounting of historical facts, events, and data, CULTURAS DE ESPAÑA, 2nd Edition emphasizes that history, culture, and civilization are concepts under constant construction. An intriguing conceptual focus brings to life the history and everyday experiences that shape national identity. Geometría Sagrada Profunda Damian Alvarez 2019-05-08 Los Sanadores y Terapeutas Vibracionales modernos como los pertenecientes a la Escuela del Sistema de Sanación Tinerfe, utilizan las vibraciones energéticas que producen ciertas formas geométricas sagradas para sanar, equilibrar, cargar energéticamente, proteger, etcétera., a seres humanos y otros seres vivos. Esta geometría que tanto sana como despierta la conciencia y otros niveles energéticos del ser humano en pro de su salud, bienestar y desarrollo personal y espiritual se podría

denominar "Geometría Sagrada".La Geometría Divina (definición de Damián Alvarez), es aquella geometría que siendo parte de la creación es la misma que forma la creación. Me explico: la energía que forma todo es energía creadora de sustento, mantenimiento y desarrollo de todo el universo. Es energía divina. Que una forma geométrica produzca energías positivas que puedan sanar significa que son energías conscientes, inteligentes, creadoras, divinas.Las formas geométricas existen en la creación sencillamente porque son las que forman la creación. La energía creativa divina, por lo tanto, se puede medir de forma geométrica. Estudiando la creación se comprendería al Creador. Se comprendería la energía divina. Podríamos hablar entonces, no de "Geometría Sagrada" o "Geometría Divina" sino de "Teometría" (palabra creada por Damián Alvarez).Empezaríamos a comprender no solo la creación y como está formada sino también al Creador. No se estudiarían las formas sino la energía que las forma.Existen 7 (número de la perfección), formas geométricas en el universo: 5 formas perfectas, el círculo (para mí, la esfera), y la espiral. Todas las formas caben dentro de la esfera y parten de ésta. Entendiendo la construcción de la esfera se entiende la construcción del universo, se entiende a Dios ...

Asmara - an urban history Belula Teclé-Misghina 2015-02-11 Like any city, Asmara, a young city even by the standards of young African capitals, is a stage set where the drama of history has unfolded in the most intense and eloquent manner. The territory of Asmara stands at the edge of a space of almost mythical civilisations, ancient religions and proud empires. It is also a natural acropolis in the vastness of Africa, an astoundingly high crest that looks down from above on the coast of the "Eritrean" sea, coming to a halt where the Afar Rift expands and, year after year, rips into the heart of Africa where lions and gnus still roam free. However, in its body, and thus in its history, Asmara is also a fragment of Europe, imported atop the undulating highlands of Hamasien by the presumption of the most fragile and thus most presumptuous of colonial nations: Italy. Less than 130 years later history appears to have intentionally concentrated a host of events, projects, interests, delusions, conflicts and hopes in Asmara that, within the vaster expanses of historical time could have filled dozens of centuries. These metamorphoses were similar to immense waves lapping at a resistant soil, introducing and withdrawing diverse foreign armies, peoples, languages and cultures; and adversities. The results of so much labour have forged the identity of Eritrea, jealously defended for decades, and jealously guarded to this day. Looking carefully in libraries, among printed works dedicated to particular aspects of this identity – numerous and some very important – it is impossible to find a history of Eritrea that is scientifically complete and up to date. This is a serious shortcoming. Yet everything has remained impressed upon the land and, even more eloquently, on the city, on the face and limbs of Asmara. Hence the reconstruction, like that made by the author of this book, of the difficult process of planning the city signifies not only restoring, similar to an animation, the history of the complex growth of an urban organism. Lucio Valerio Barbera UNESCO Chairholder in "Sustainable Urban Quality and Urban Culture, notably in Africa", Sapienza Università di Roma At the end of the Thirties, from Naples to Massawa (the 'Port of Empire', since 1890 an important commercial base and natural access point for anyone wishing to reach Asmara and the Eritrean uplands), the voyage took five days; from the port one could reach the capital of the Colony by train, on an intrepid mountain rail-way, or by a motor road, Road n° 1 from Dogali - Asmara was only 120 km away. If one wanted to make the journey by air, it took three and a half days, thanks to the 'Empire Line', which involved taking a seaplane from the Carlo Del Prete base in Ostia to Benghazi in Libya, and then a plane to the Umberto Maddalena Airport in Asmara, with stops at Cairo, Wadi Haifa, Khartoum and Càssala, on the Sudanese border. And right next door to the Airport stood the Teleferica Massawa-Asmara, an extraordinary cableway for transporting goods up on to the plateau, at a height difference of 2,326 metres; the cableway had been built in two years, between 1935 and 1937, and at a length of 75 km, was the longest industrial cableway system in the world. It could move in one day the equivalent of thirty train loads, but it was at its full operational capacity for only a few years: in 1941 it was damaged in the war with the British, and ten years later, when Eritrea became a British Protectorate, it was unexpectedly decided to dismantle it. capital of the new country. These events act as a backdrop and form a solid framework for Teclé Misghina's research – which is not only meticulous but emotionally involved – of which this book is a well-documented summary. Her research is important in that it reconfigures and puts in order various documents, both known and

unpublished, in order to build up a chronology and an armoury of references that are indispensable for anyone wishing to carry out further studies on the Eritrean capital. For a project developed within a Doctoral programme, this is, in my opinion, the most important outcome of her research. 2012-03-08T00:00:00+01:00 Il volume è una nuova edizione ampliata e arricchita del Catalogo della Mostra "Architettura e Massoneria" (promossa dal Grande Oriente d'Italia a Firenze nel 1998) che ricostruiva per la prima volta, a grandi linee, il quadro d'insieme dei significati esoterici dell'architettura. Il volume è articolato in 10 sezioni. La preistoria della tradizione muratoria, ricostruita attraverso il vecchio testamento massonico stratificatosi attraverso la trasmissione orale e i testi fondamentali dal "Poema regius" (1390 c.) alle "Constitutions" dell'Anderson (1723). Vengono passate in rassegna le "divine architetture" ispirate dal Grande Architetto come il Tempio di Salomone. Gli archetipi dell'Ars Regia. Protostoria della Massoneria: la costruzione della Cattedrale. Protostoria della Massoneria: l'Architettura filosofale. Il dibattito sullo "stile" massonico. Panorama delle regioni dell'architettura "massonica", di qua e di là dell'Atlantico. I simboli e le idee. La scoperta della impostazioni massonica di Washington, la Capitale degli States. La città massonica. Le avanguardie esoteriche.

Pensieri del Tè Guido Ceronetti 2015-07-30T00:00:00+02:00 Due volte al giorno, di prima mattina e verso le cinque del pomeriggio, Ceronetti beve qualche tazza di tè verde cinese. In quei momenti la parola si riaccende,

la mente opera collegamenti nuovi. «Il soffio del Tè s'infonde negli angoli morti, non si sgomenta d'interrogare statue imbracate». Da dove vengono, quei pensieri? Da ogni luogo, dai dizionari e dal ricordo, da Bernadette e da Rathenau, dal Corano e da Conrad, da Baudelaire e da Tocqueville, da un ritaglio di giornale e da un sogno. Ceronetti gli avvolge intorno, con delicatezza, un altro pensiero, «che si fa parola o figura». Così si sono formate queste pagine, che avranno sui loro lettori lo stesso effetto rischiarante che ha il tè verde sul loro autore, agendo come un'invisibile e aromatica barriera di protezione «da ogni specie d'inerzia, d'inebetimento, di abbattimento».

The Architecture of Modern Italy Terry Kirk 2005-06-02 "Modern Italy" may sound like an oxymoron. For Western civilization, Italian culture represents the classical past and the continuity of canonical tradition, while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters, baroque piazzas, and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena, Saint Peter's, all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time; but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal tourist or seasoned historian, we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task, one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.
