Asia in International Relations Pinar Bilgin 2017-02-01 Asia in International Relations decolonizes conventional understandings and representations of Asia in International Relations (IR). This book opens by including all those geographical and cultural linkages that constitute Asia today but are generally ignored by mainstream IR. Covering the Indian subcontinent, Turkey, the Mediterranean, Iran, the Arab world, Ethiopia, and Central-Northeast-Southeast Asia, the volume draws on rich literatures to develop our understanding of power relations in the world's largest continent. Contributors "de-colonize", "de-imperialize", and "de-Cold War" the region to articulate an alternative narrative about Asia, world politics, and IR. This approach reframes old problems in new ways with the possibility of transforming them, rather than recycling the same old approaches with the same old "intractable" outcomes.

Economics After the Crisis Irene van Staveren 2014-12-05 Economics After the Crisis is an introductory economics textbook, covering key topics in micro and macro economics. However, this book differs from other introductory economics textbooks in the perspective it takes, and it incorporates issues that are presently underserved by existing textbooks on the market. This book offers an introduction to economics that takes into account criticisms of the orthodox approach, and which acknowledges the role that this largely Western approach has played in the current global financial and

economic crisis. A key feature of the book is its global approach: it offers examples from countries all over the world, including from developing and emerging economies. The chapters discuss all major economic topics, including individuals and households; the behaviour of consumers; the behaviour of firms; markets; the role of the state; public goods and commons; labour markets; capital markets; the macroeconomic flow; economic growth; international trade; nature and environmental externalities; poverty and wellbeing. Throughout, the book presents theoretical perspectives in which social structures, relatedness, uncertainty, and social norms provide key economic explanations, contrasting these with the idealized worldview of neoclassical economics. Economics After the Crisis is designed for a one-semester introductory course in economics, primarily at undergraduate but also at postgraduate level, and is suitable for students from a range of disciplines. It will be of particular relevance to those students with an interest in developing economies. <https://www.coursera.org/learn/economicsfromapluralistperspective> MH-SET Paper 1 Guide for Assistant Professor with Past Questions Disha Experts 2020-02-29 Arun Deep's 10 Years Solved Papers For ICSE Class 10 Exam 2023 - Comprehensive Handbook Of 15 Subjects - Year-Wise Board Solved Question Papers, Revised Syllabus Panel of Authors Easy, Quick, and Concise Revision with Arun Deep's 10 Years Solved Papers for ICSE Class 10 Board Examinations 2023. Arab Development Denied Ali Kadri 2015-03-15 Arab Development Denied examines how over the last three decades the Arab world has undergone a process of developmental descent, or de-development. As a result of defeat in wars, the loss of security and sovereignty, and even their own class proclivity, the Arab ruling classes have been transformed into fully compradorial classes that have relinquished autonomy over policy. The neoliberal policies adopted since the early eighties are not developmental policies, but the terms of surrender by which Arab resources, human or otherwise, are stifled or usurped. In this book, Ali Kadri attributes the Arab world's developmental failure to imperialist hegemony over oil and the rising role of financialisation, which goes hand in hand with the wars of encroachment that strip the Arab world of its sovereignty and resources.

The Rise of Africa's Middle Class
Henning Melber 2016-12-15 Across
Africa, a burgeoning middle class has
become the poster child for the
'Africa rising' narrative. Ambitious,
aspirational and increasingly
affluent, this group is said to
embody the values and hopes of the
new Africa, with international bodies
ranging from the United Nations
Development Programme to the World
Bank regarding them as important

agents of both economic development
and democratic change. This
narrative, however, obscures the
complex and often ambiguous role that
this group actually plays in African
societies. Bringing together
economists, political scientists,
anthropologists and development
experts, and spanning a variety of
case studies from across the
continent, this collection provides a
much-needed corrective to the
received wisdom within development
circles, and provides a fresh
perspective on social transformations
in contemporary Africa.

Globalization and Transnational
Capitalism in Asia and Oceania Jeb
Sprague 2015-12-15 News headlines
warn of rivalries and competing
nations across Asia and the Pacific,
even as powerful new cross-border
relations form as never before. This
book looks behind the Asia-Pacific
curtain: at the new forms of social,
economic, and political integration
taking place through a global
capitalism that is rife with
contradictions, inequality, and
crisis. We are moved beyond
traditional conceptualizations of the
inter-state system with its nation-
state competition as the core
organizing principle of world
capitalism and the principal
institutional framework that shapes
the makeup of global social forces.
These important studies examine and
debate over how there is a growing
transnationality of material
(economic) relations in the global
era, as well as an emerging
transnationality of many social and
class relations. How does
transnational capitalist class
fractions, new middle strata, and
labor undergird globalization in Asia
and Oceania? How have states and
institutions become entwined with
such processes? This book provides
insight into a field of dynamic
change.

**Crises in Europe in the Transatlantic
Context** Bruno Dallago 2015-01-30 The
adoption and management of the common
currency has led the Eurozone to a
critical point. This book analyzes in
an interdisciplinary way the
fundamental causes of distress,

making sure to relate economic issues to the social and political aspects of the problem. The book explores the reasons why the Eurozone has fallen into a policy trap, as well as what Europe did and should do to exit the crisis, and why this is proving to be so difficult. The book also considers what role the United States has played, and could play to help foster a solution for the Eurozone. The main topics explored are the complex nature of the crisis, the short circuit between policies and the given institutional architecture, the controversial role of Germany, and the importance of an active role of the US. The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress. The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU; and pay attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency.

Local and Regional Development Andy Pike 2016-07-15 Actors and institutions in localities and regions across the world are seeking prosperity and well-being amidst tumultuous and disruptive shifts and transitions generated by: an increasingly globalised, knowledge-intensive capitalism; global financial instability, volatility and crisis; concerns about economic, social and ecological sustainability, climate change and resource

shortages; new multi-actor and multi-level systems of government and governance and a re-ordering of the international political economy; state austerity and retrenchment; and, new and reformed approaches to intervention, policy and institutions for local and regional development. Local and Regional Development provides an accessible, critical and integrated examination of local and regional development theory, institutions and policy in this changing context. Amidst its rising importance, the book addresses the fundamental issues of 'what kind of local and regional development and for whom?', its purposes, principles and values, frameworks of understanding, approaches and interventions, and integrated approaches to local and regional development throughout the world. The approach provides a theoretically informed, critical analysis of contemporary local and regional development in an international and multi-disciplinary context, grounded in concrete empirical analysis from experiences in the global North and South. It concludes by identifying what might constitute holistic, inclusive, progressive and sustainable local and regional development, and reflecting upon its limits and political renewal.
