United States Code: Title 8: Aliens and nationality to Title 10: Armed forces [sections] 101-1414 2013 Preface 2012 edition: The United States Code is the official codification of the general and permanent laws of the United States. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First session, enacted between January 3, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 USC 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful

From Prohibited Immigrants to Citizens Jonathan Klaaren 2017-10-31 Jonathan Klaaren blends legal and social history in this engaging account of early conceptions of South African citizenship. He argues that distinctively South African notions of citizenship and nationality come out of the period 1897 to 1937, through legislation and official practices employing the key concept of 'prohibited immigrant' and seeking to regulate the mobility of three population groups: African, Asian and European. Further, he makes the case that the regulation and administration of immigrants from the Indian sub-continent, in particular, provided the basis for the vision and eventual reality of a unified, although structurally unequal, South African population. This book fits into the growing field of Mobility Studies, which seeks to understand and document the migration of people both within and across national borders, while exploring the origins of those borders. In addition to nationality and citizenship, it touches on African pass laws, the origins of the Public Protector, the scheme importing Chinese labour to the gold mines, the development of internal bureaucratic legality, and India-South Africa intra-imperial relations. With its attention to the role of law in state-building and its understanding of the central place of implementation and administrative law in migration policy, this book offers a distinctive focus on the relationship between migration and citizenship.
