Literary Journalism on Trial Kathy Roberts Forde 2008 In November 1984, Jeffrey Masson filed a libel suit against writer Janet Malcolm and the New Yorker, claiming that Malcolm had intentionally misquoted him in a profile she wrote for the magazine about his former career as a Freud scholar and administrator of the Freud archives. Over the next twelve years the case moved up and down the federal judicial ladder, at one point reaching the U.S. Supreme Court, as lawyers and judges wrestled with questions about the representation of "truth" in journalism and, by extension, the limits of First Amendment protections of free speech. Had a successful Freudian scholar actually called himself an "intellectual gigolo" and "the greatest analyst who ever lived"? Or had a respected writer for the New Yorker knowingly placed false, self-damning words in her subject's mouth? In *Literary Journalism on Trial*, Kathy Roberts Forde explores the implications of *Masson v. New Yorker* in the context of the history of American journalism. She shows how the case represents a watershed moment in a long debate between the advocates of traditional and literary journalism and explains how it reflects a significant intellectual project of the period: the postmodern critique of objectivity, with its insistence on the instability of language and rejection of unitary truth in human affairs. The case, Forde argues, helped widen the perceived divide between ideas of literary and traditional journalism and forced the resolution of these conflicting conceptions of truth in the constitutional arena of libel law. By embracing traditional journalism's emphasis on fact and objectivity and rejecting a broader understanding of truth, the Supreme Court turned away from the First Amendment theory articulated in previous rulings, opting to value less the free, uninhibited interchange of ideas necessary to democracy and more the "trustworthiness" of public expression. The Court's decision in this case thus had implications that reached beyond the legal realm to the values and norms expressed in the triangular relationship between American democracy,

First Amendment principles, and the press.

Literary Journalism in British and American Prose Doug Underwood 2019-05-10 The debate surrounding "fake news" versus "real" news is nothing new. From Jonathan Swift's work as an acerbic, anonymous journal editor-turned-novelist to reporter Mark Twain's hoax stories to Mary Ann Evans' literary reviews written under her pseudonym, George Eliot, famous journalists and literary figures have always mixed fact, imagination and critical commentary to produce memorable works. Contrasting the rival yet complementary traditions of "literary" or "new" journalism in Britain and the U.S., this study explores the credibility of some of the "great" works of English literature.

American Exceptionalism, the French Exception, and Digital Media Law Lyombe S. Eko 2013-07-10 This volume explores and explains sameness and difference between the United States and France in the matters of freedom of expression on the Internet, the management of the tensions that arise between freedom of expression and the right of privacy of public figures, the comparative role of interest groups in the regulation of Internet content in both countries, the intellectual property implications of the digitization and transfer of journalistic works from print to searchable electronic databases, how courts in the United States and France managed the copyright issues that were triggered by the Google Book Search project, as well as the clash between intellectual property rights and freedom of expression in the area of parody or "gripe" web sites on the Internet. The volume presents American exceptionalism and the French exception as functionally equivalent logics that lead to different freedom of expression outcomes. This book makes a significant contribution to comparative communication law studies, an area that has not received serious academic interest.

Drama and "Ideenschmuggel" K. Scott Baker 2008 This monograph details Gutzkow's recurring use of performance-within-the-play as a means of encouraging an active, political response by the audience. He incorporates an internal audience viewing a performance on stage in order to model an ideal of dramatic reception for the audiences of his own play. Gutzkow structures the narrative contextualization of these performances as reflections of specific issues in the German states of the Vormärz. Beginning with an overview of theoretical and literary texts from the 1830s, this study traces Gutzkow's transferral of self-reflexive structures from his novels of this decade into his first staged play, *Richard Savage* (1839), and on through *Das Urbild des Tartüffe* (1844) and *Uriel Acosta* (1845). It concludes by portraying *Der Königsleutnant* (1849) as a transitional work that shows Gutzkow's decision to return to the novel as a consequence of the failure of his plays to attain the reception he intended. By using the coherency of the communicated message instead of fealty to aesthetic norms as the evaluative criteria for discussing Gutzkow's plays, the book exposes an innovative mode of specifically literary social criticism in these works that complements their traditional assessment as documentation of the cultural history of Liberalism in this period.

Demarcating the Disciplines Samuel Weber 1986

Demarcating the Disciplines was first published in 1986. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. With publication of this volume, *Glyph* begins a new stage in its existence: the move from Johns Hopkins University Press to the University of Minnesota Press is accompanied by a change in focus. In its first incarnation *Glyph* provided a forum in which established notions of reading, writing, and criticism could be questioned and explored. Since then, the greater currency of such concerns has brought with it new problems and priorities. Setting aside the battles of the past, the new *Glyph* looks ahead - to confront historical issues and to address the institutional and pedagogical questions emerging from the contemporary critical landscape. Each volume in the new *Glyph* series is organized around a specific issue. The essays in this first volume explore the relations between the practice of reading and writing and the operations of the institution. Though their approaches differ from one another, the authors of these essays all recognize that the questions of the institution - most notably the university - points toward a series of constraints that define, albeit negatively, the possibilities for change. The contributors: Samuel Weber, Jacques Derrida, Tom Conley, Malcolm Evans, Ruth Salvaggio, Robert Young, Henry Sussman, Peter Middleton, David Punter, and Donald Preziosi.

Pursuing an Ethic of Empathy in Journalism Janet Blank-Libra 2016-06-23 This book advances a journalistic theory of empathy, challenging long-held notions about how best to do journalism. Because the institution of journalism has typically equated empathy and compassion with bias, it has been slow to give the intelligence of the emotions a legitimate place in the reporting and writing process. Blank-Libra's work locates the point at which the vast, multidisciplinary research on empathy intersects with the work of the journalist, revealing a reality that has always been so: journalists practice empathy as a way to connect but also as a form of inquiry, as sincere and legitimate in its goals and aspirations as is objectivity.

Reinventing Professionalism Silvio Waisbord 2013-08-26 Current anxiety about the future of news makes it opportune to revisit the notion of professionalism in journalism. Media expert Silvio Waisbord takes this pressing issue as his theme and argues that "professional journalism" is both a normative and analytical notion. It refers to reporting that observes certain ethical standards as well as to collective efforts by journalists to exercise control over the news. Professionalism should not be narrowly associated with the normative ideal as it historically developed in the West during the past century. Instead, it needs to be approached as a valuable concept to throw into sharp relief how journalists define conditions and rules of work within certain settings. Professionalization is about the specialization of labor and control of occupational practice. These issues are important, particularly amidst the combination of political, technological and economic trends that have profoundly unsettled the foundations of modern journalism. By doing so, they have stimulated the reinvention of professionalism. This engaging and insightful book critically examines the meanings, expectations, and critiques of professional journalism in a global context.

Why I Write George Orwell 2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' – 'sheer egoism', 'aesthetic enthusiasm',

'historical impulse' and 'political purpose' – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can – and must – be rediscovered with every age.' – Irish Times

Re-imagining African Identity in the Twenty-First Century Fetson Anderson Kalua 2020-05-21 The book discusses the idea of African identity in the twenty-first century, calling into question and deconstructing any understanding and representation of the idea of

African identity as being based exclusively on the notion of 'Blackness', or the Black race. In countering such an idea of African identity as a flawed notion, the text propounds the idea of intermediality as a new modality of thinking about the importance of embracing the primacy of tolerance for the difference of identity. The notion of intermediality promotes the need for

people of all races across the African continent to embrace the idea of difference as the defining feature of African identity so that the geographical locality called Africa is seen as a vibrant, open, and cosmopolitan continent which is accessible to people of all races and identities.
