Stars and Strife John Redwood 2001-01-01 This text looks ahead to the coming conflicts between the USA and the emerging United States of Europe. Should Britain become the 15th state of Euroland or the 51st state of America? John Redwood sets out four possible futures for Britain, concluding that joining the European political project would be bad for the UK and for the cause of free trade and democracy around the world. He explains why the USA has need of the special relationship with Britain and how the English speaking world offers the best approach to peace and prosperity in a dot.com world.

When Professionals Weep Renee S. Katz 2016-01-22 When Professionals Weep speaks to the humbling and often transformational moments that clinicians experience in their careers as caregivers and healers—moments when it is often hard to separate the influence of our own emotional responses and worldviews from the patient’s or family’s. When Professionals Weep addresses these poignant moments—when the professional’s personal experiences with trauma, illness, death, and loss can subtly, often stealthily, surface and affect the helping process. This edition, like the first, both validates clinicians’ experiences and also helps them process and productively address compassion fatigue, burnout, and secondary traumatic stress. New material in the second edition includes increased emphasis on the burgeoning fields of hospice and palliative care, organizational countertransference, mindfulness, and compassionate practice. It includes thought-provoking cases, self-assessments, and exercises that can be used on an individual, dyadic, or group basis. This volume is an invaluable handbook for practitioners in the fields of medicine, mental health, social work, nursing, chaplaincy, the allied health sciences, psychology, and psychiatry.

The Age of Surveillance Capitalism Shoshana Zuboff 2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, The Guardian The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. The Age of Surveillance Capitalism is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

Veganism Eva Haifa Giraud 2021-07-29 What exactly do vegans believe? Why has veganism become such a critical and criticized social movement, and how does veganism correspond to wider debates about sustainability, animal studies, and the media? Eva Haifa Giraud offers an accessible route into the debates that surround vegan politics, which feed into broader issues surrounding food activism and social justice. Giraud engages with arguments in favor of veganism, as well as the criticisms levelled at vegan politics. She interrogates debates and topics that are central to conversations around veganism, including identity, intersectional politics, and activism, with research drawn from literary animal studies, animal geographies, ecofeminism, posthumanism, critical race theory, and new materialism. Giraud makes an original theoretical intervention into these often fraught debates, and argues that veganism holds radical political potential to act as “more than a diet” by disrupting commonplace norms and assumptions about how humans relate to animals. Drawing on a range of examples, from recipe books with punk aesthetics to social media campaigns, Giraud shows how veganism's radical potential is being complicated by its commercialization, and elucidates new conceptual frameworks for reclaiming veganism as a radical social movement. *Ecological Ethics* Patrick Curry 2006 Taking issue with the common assumption that human ethics can be 'extended' to meet the demands of the ongoing ecological crisis, Curry demonstrates that a new and truly ecological ethic is both possible and urgently needed.

Hope in the Dark Rebecca Solnit 2016-05-14 “[A] landmark book . . . Solnit illustrates how the uprisings that begin on the streets can upend the status quo and topple authoritarian regimes” (Vice). A book as powerful and influential as Rebecca Solnit’s Men Explain Things to Me, her Hope in the Dark was written to counter the despair of activists at a moment when they were focused on their losses and had turned their back to the victories behind them—and the unimaginable changes soon to come. In it, she makes a radical case for hope as a commitment to act in a world whose future remains uncertain and unknowable. Drawing on her decades of activism and a wide reading of environmental, cultural, and political history, Solnit argues that radicals have a long, neglected history of transformative victories, that the positive consequences of our acts are not always immediately seen, directly knowable, or even measurable, and that pessimism and despair rest on an unwarranted confidence about what is going to happen next. Now, with a moving new introduction explaining how the book came about and a new afterword that helps teach us how to hope and act in our unnerving world, she brings a new illumination to the darkness of our times in an unforgettable new edition of this classic book. “One of the best books of the 21st century.” —The Guardian “No writer has better understood the mix of fear and possibility, peril and exuberance that’s marked this new millennium.” —Bill McKibben, New York Times–bestselling author of Falter “An elegant reminder that activist victories are easily forgotten, and that they often come in extremely unexpected, roundabout ways.” —The New Yorker

Living in the Environment G. Tyler Miller 2016-12-05 In the new edition of LIVING IN THE ENVIRONMENT, authors Tyler Miller and Scott Spoolman continue to work with the National Geographic Society in developing a text designed to equip students with the inspiration and knowledge they need to make a difference in solving today's environmental issues. Using sustainability as the integrating theme, LIVING IN THE ENVIRONMENT, 19th Edition, provides clear introductions to the multiple environmental problems that we face and balanced discussions to evaluate potential solutions. New Core Case Studies for 11 of the book’s 25 chapters bring important real-world stories to the forefront; new questions added to the captions of figures that involve data graphs give students additional practice evaluating data; and a new focus on learning from nature includes coverage of principles and applications of biomimicry in most chapters. The Law and Ecology of Pesticides and Pest Management Mary Jane Angelo 2016-03-03 Although concerns over the ecological impacts of pesticides gave rise to the environmental movement of the late 1960s and 1970s, since that time, pesticide use and its effects have been largely ignored by the law and by legal scholars. This book addresses this omission by providing a unique and serious treatment of the significance of pesticide issues in environmental law and takes an ecological perspective on the legal issues. Dealing with a wide range of questions relating to pests and pesticides, the book focuses primarily on agricultural pesticide use as the largest contaminator in the US. It also examines the legacy of past pesticide use and analyzes how recent developments in ecological science can inform the law and increase our understanding of ecology. Interdisciplinary in its approach, the book will be of interest to academics, lawyers, scientists and environmental and agricultural professionals.

How to Blow Up a Pipeline Andreas Malm 2021-01-05 Property will cost us the earth The science on climate change has been clear for a very long time now. Yet despite decades of appeals, mass street protests, petition campaigns, and peaceful demonstrations, we are still facing a booming fossil fuel industry, rising seas, rising emission levels, and a rising temperature. With the stakes so high, why haven't we moved beyond peaceful protest? In this lyrical manifesto, noted climate scholar (and saboteur of SUV tires and coal mines) Andreas Malm makes an impassioned call for the climate movement to escalate its tactics in the face of ecological collapse. We need, he argues, to force fossil fuel extraction to stop--with our actions, with our bodies, and by defusing and destroying its tools. We need, in short, to start blowing up some oil pipelines. Offering a counter-history of how mass popular change has occurred, from the democratic revolutions overthrowing dictators to the movement against apartheid and for women's suffrage, Malm argues that the strategic acceptance of property destruction and violence has been the only route for revolutionary change. In a braided narrative that moves from the forests of Germany and the streets of London to the deserts of Iraq, Malm offers us an incisive discussion of the politics and ethics of pacifism and violence, democracy and social change, strategy and tactics, and a movement compelled by both the heart and the mind. Here is how we fight in a world on fire.

Obesogenic Environments Amelia Lake 2011-06-09 In a world where obesity has now reached epidemic proportions, a thorough understanding of the underlying causes of the problem is essential if society, public health initiatives and government policies are to successfully address the issue. The obesogenic environment describes all the possible influences that our environment presents which encourage overweight and obesity in individuals and populations. Beginning with an overarching introduction to obesity and its implications for health and wellbeing, the book will move on to consider such crucial areas as eating behaviours and food environments, physical activity and the environment, the urban environment, methods, policy and future research directions. Brings together expertise from across a range of disciplines Written by a truly multidisciplinary team of international authors Presents some of the most innovative thinking in the battle against obesity This groundbreaking book brings together for the first time the knowledge of experts with backgrounds in nutrition and dietetics, policy, epidemiology, environmental sciences, medical sciences, town planning and urban design, transport, geography and physical activity in order to offer a multidisciplinary approach to public health, suggesting new and exciting ways to shape our environment to better support healthful decisions.

Caffeine for the Sustainment of Mental Task Performance Institute of Medicine 2002-01-07 This report from the Committee on Military Nutrition Research reviews the history of caffeine usage, the metabolism of caffeine, and its physiological effects. The effects of caffeine on physical performance, cognitive function and alertness, and alleviation of sleep deprivation impairments are discussed in light of recent scientific literature. The impact of caffeine consumption on various aspects of health, including cardiovascular disease, reproduction, bone mineral density, and fluid homeostasis are reviewed. The behavioral effects of caffeine are also discussed, including the effect of caffeine on reaction to stress, withdrawal effects, and detrimental effects of high intakes. The amounts of caffeine found to enhance vigilance and reaction time consistently are reviewed and recommendations are made with respect to amounts of caffeine appropriate for maintaining alertness of military personnel during field operations. Recommendations are also provided on the need for appropriate labeling of caffeine-containing supplements, and education of military personnel on the use of these supplements. A brief review of some alternatives to caffeine is also provided.

Fashionopolis Dana Thomas 2019-09-05 An investigation into the damage wrought by the colossal clothing industry – and the grassroots, high tech, international movement fighting to reform it. What should I wear? It's one of the fundamental questions we ask ourselves every day. More than ever, we are told it should be something new. Today, the clothing industry churns out 80 billion garments a year and employs every sixth person on Earth. Historically, the apparel trade has exploited labour, the environment, and intellectual property – and in the last three decades, with the simultaneous unfurling of fast fashion, globalization, and the tech revolution, those abuses have multiplied exponentially – and primarily out of view. We are in dire need of an entirely new human-scale model. Bestselling journalist Dana Thomas has travelled the globe to discover the visionary designers and companies who are propelling the industry toward that more positive future by reclaiming traditional craft and launching cutting-edge sustainable technologies to produce better fashion. In Fashionopolis, Thomas sees renewal in a host of developments, including printing 3-D clothes, clean denim processing, smart manufacturing, hyperlocalism, fabric recycling – even lab-grown materials. From small-town makers and Silicon Valley whizzes to household names such as Stella McCartney, Levi's and Selfridges, Thomas highlights the companies big and small that are leading the crusade. We all have been casual about our clothes. It's time to get dressed with intention. Fashionopolis is the first comprehensive look at how to start.

Living in the Environment George Tyler Miller 2005 This undergraduate textbook provides the scientific base for understanding environmental concerns, describes the primary natural resource and environmental quality problems being faced, and evaluates solutions to those problems.

The Licit Life of Capitalism Hannah Appel 2019-12-13 The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

How to Prepare for Climate Change David Pogue 2021-01-26 A practical and comprehensive guide to surviving the greatest disaster of our time, from New York Times bestselling self-help author and best-selling CBS Sunday Morning science and technology correspondent David Pogue. You might not realize it, but we're already living through the beginnings of climate chaos. In Arizona, laborers now start their day at 3 a.m. because it's too hot to work past noon. Chinese investors are snapping up real estate in Canada. Millennials have evacuation plans. Moguls are building bunkers. Retirees in Miami are moving inland. In How to Prepare for Climate Change, bestselling self-help author David Pogue offers sensible, deeply researched advice for how the rest of us should start to ready ourselves for the years ahead. Pogue walks readers through what to grow, what to eat, how to build, how to insure, where to invest, how to prepare your children and pets, and even where to consider relocating when the time comes. (Two areas of the country, in particular, have the requisite cool temperatures, good hospitals, reliable access to water, and resilient infrastructure to serve as climate havens in the years ahead.) He also provides wise tips for managing your anxiety, as well as action plans for riding out every climate catastrophe, from superstorms and wildfires to ticks and epidemics. Timely and enlightening, How to Prepare for Climate Change is an indispensable guide for anyone who read The Uninhabitable Earth or The Sixth Extinction and wants to know how to make smart choices for the upheaval ahead.

My Name Is Why Lemn Sissay 2019-08-29 THE NUMBER ONE SUNDAY TIMES BESTSELLER INDIE BOOK AWARDS NON-FICTION WINNER 'EXTRAORDINARY' The Times, 'BEAUTIFUL' Dolly Alderton, 'SHATTERING' Observer, 'INCREDIBLE' Benjamin Zephaniah, 'UNPUTDOWNABLE' Sunday Times, 'ASTOUNDING' Matt Haig 'POWERFUL' Elif Shafak At the age of seventeen, after a childhood in a foster family followed by six years in care homes, Norman Greenwood was given his birth certificate. He learned that his real name was not Norman. It was Lemn Sissay. He was British and Ethiopian. And he learned that his mother had been pleading for his safe return to her since his birth. This is Lemn's story: a story of neglect and determination, misfortune and hope, cruelty and triumph. Sissay reflects on his childhood, self-expression and Britishness, and in doing so explores the institutional care system, race, family and the meaning of home. Written with all the lyricism and power you would expect from one of the nation's best-loved poets, this moving, frank and timely memoir is the result of a life spent asking questions, and a celebration of the redemptive power of creativity.

Environmental Science G. Tyler Miller 2012-01-01 ENVIRONMENTAL SCIENCE inspires and equips students to make a difference for the world. Featuring sustainability as their central theme, authors Tyler Miller and Scott Spoolman emphasize natural capital, natural capital degradation, solutions, trade-offs, and the importance of individuals. As a result, students learn how nature works, how they interact with it, and how humanity has sustained and can continue to sustain its relationship with the earth by applying nature's lessons to economies and individual lifestyles. Engaging features like Core Case Studies, and Connections boxes demonstrate the relevance of issues and encourage critical thinking. Updated with new learning tools, the latest content, and an enhanced art program, this highly flexible book allows instructors to vary the order of chapters and sections within chapters to meet the needs of their courses. Two new active learning features conclude each chapter. Doing Environmental Science offers project ideas based on chapter content that build critical thinking skills and integrate scientific method principles. Global Environmental Watch offers online learning activities through the Global Environment Watch website, helping students connect the book's concepts to current real-world issues. The Power of Now Eckhart Tolle 2010-10-06 To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, The Power of Now is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.
