The Private International Law of Companies in Europe Carsten Gerner-Beuerle 2019-10-31 Can firms freely choose their place for corporation and thus the applicable law? And is it possible that a firm can subsequently reincorporate in another country, with the effect of a change of the law applicable to this country? In the European Union, the answer to these questions has to consider the impact of the freedom of establishment and the corresponding case law of the Court of Justice. Beyond some general principles, there is, however, considerable diversity between the laws of Member States. Thus, this book aims to provide an up-to-date analysis of this important area of law for all Member States. It is based on a comprehensive study, produced for the European Commission, on the private international law of companies in the European Union.

A False Tree of Liberty Susan Marks 2019-11-21 This book is concerned with the history of the idea of human rights. It offers a fresh approach that puts aside familiar questions such as 'Where do human rights come from?' and 'When did human rights begin?' for the sake of looking into connections between debates about the rights of man and developments within the history of capitalism. The focus is on England, where, at the end of the eighteenth century, a heated controversy over the rights of man coincided with the final enclosure of common lands and the momentous changes associated with early industrialisation. Tracking back still further to sixteenth- and seventeenth-century writing about dispossession, resistance and rights, the book reveals a forgotten tradition of thought about central issues in human rights, with profound implications for their prospects in the world today.

Game of Spies Paddy Ashdown 2016-09-22 A riveting three-way spy story set in occupied France. 'Game of Spies' tells the story of a lethal spy triangle between 1942 and 1944 in Bordeaux - and of France's greatest betrayal by aristocratic and right-wing Resistance leader Andre Grandclement. The story centres on three men: one British, one French and one German and the duel they fought out in an atmosphere of collaboration, betrayal and assassination, in which comrades sold fellow comrades, Allied agents and downed pilots to the Germans, as casually as they would a bottle of wine. It is a story of SOE, treachery, bed-hopping and executions in the city labelled 'la plus collaboratrice' in the whole of France.

Program Management Ginger Levin 2012-11-29 Program management is a rapidly emerging offshoot of project management. So much so that AT&T, IBM, and other organizations, both large and small in all sectors, have initiated a push to certify program managers. And, although universities offer courses in program management, there are few books available to guide program managers through this field that requires a broad level of knowledge and experience. The definitive reference on program management, Program Management: A Life Cycle Approach provides this much needed guidance. Edited by Dr. Ginger Levin, the second person to become a PMI® certified program manager (PgMP®), this handbook presents a cohesive compilation of program management knowledge from more than 20 certified PgMPs. It considers the entire program life cycle and its phases—from initiation to sustainability. Each chapter is written by an experienced PgMP from a wide range of industries and countries. Combining the rigor of an academic reference with easy-to-read language, the book covers the themes in the PMI Standard for Program Management and ties them to program managers' work. The chapters reference PMI's standards, complement the concepts in the standards, and expand on the concepts and issues that the standard mentions in passing. The book also addresses a few issues that the standard does not touch on at all. The book can be read in its entirety, or specific chapters of interest can be read separately. Overall, the book provides practitioners with a reliable source of information on the key themes and issues in program management. It is useful for individuals desiring to attain the PgMP credential and suitable for colleges and universities offering courses in program management.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Intelligent Systems Crina Grosan 2011-07-29 Computational intelligence is a well-established paradigm, where new theories with a sound biological understanding have been evolving. The current experimental systems have many of the characteristics of biological computers (brains in other words) and are beginning to be built to perform a variety of tasks that are difficult or impossible to do with conventional computers. As evident, the ultimate achievement in this field would be to mimic or exceed human cognitive capabilities including reasoning, recognition, creativity, emotions, understanding, learning and so on. This book comprising of 17 chapters offers a step-by-step introduction (in a chronological order) to the various modern computational intelligence tools used in practical problem solving. Starting with different search techniques including informed and uninformed search, heuristic search, minmax, alpha-beta pruning methods, evolutionary algorithms and swarm intelligent techniques; the authors illustrate the design of knowledge-based systems and advanced expert systems, which incorporate uncertainty and fuzziness. Machine learning algorithms including decision trees and artificial neural networks are presented and finally the fundamentals of hybrid intelligent systems are also depicted. Academics, scientists as well as engineers engaged in research, development and application of computational intelligence techniques, machine learning and data mining would find the comprehensive coverage of this book invaluable.

The collection of papers in this volume focuses on important issues, such as the nature of the relation between syntax and morphology in determining agreement relations; whether and which syntactic configurations are relevant for determining agreement; the relevance of verbal agreement for the purposes of EPP; the inquiry into the existence of connections between verbal and DP-internal agreement; on the morphological and syntactic distinction of person, number and gender agreement; how and why AGREE and Spec, head relations trigger different agreement effects; and the type of relation that exists between head-movement and morphological agreement. Intelligent Information Processing and Web Mining Mieczysław A. Kłopotek 2006-05-28 The international conference Intelligent Information Processing and Web Mining IIS:IIPWM'05, organized in Gdańsk-Sobieszewo on 13–16th June, 2005, was a continuation of a long tradition of conferences on applications of Artificial Intelligence (AI) in Information Systems (IS), organized by the Institute of Computer Science of Polish Academy of Sciences in cooperation with other scientific and business institutions. The Institute itself is deeply engaged in research both in AI and IS and many scientists view it as a leading institution both in fundamental and applied research in these areas in Poland. The originators of this conference series, Prof. M. Dębrowski and Dr. M. Michalewicz had in 1992 a long-term goal of bringing together scientists and industry of different branches from Poland and abroad to achieve a creative synthesis. One can say that their dream has come to reality. Scientists from seven continents made their submissions to this conference. A brief look at the relations makes international cooperation visible. The research papers have either a motivation in concrete applications or are offsprings of some practical requests. This volume presents the best papers carefully chosen from a large set of submissions (about 45%). At this point we would like to express our thanks to the members of Programme Committee for their excellent job. Also we are thankful to the organizers of the special sessions accompanying this conference: Jan Komorowski, Adam Przepiórkowski, Zbigniew W.

Europe's Passive Virtues JAN. ZGLINSKI 2020-06-04 The European Court of Justice has been celebrated as a central force in the creation and deepening of the EU internal market. Yet, it has also been criticized for engaging in judicial activism, restricting national regulatory autonomy, and taking away the powers of Member State institutions. In recent years, the Court appears to afford greater deference to domestic actors in free movement cases. *Europe's Passive Virtues* explores the scope of and reasons for this phenomenon. It enquires into the decision-making latitude given to the Member States through two doctrines: the margin of appreciation and decentralized judicial review. At the heart of the book lies an original empirical study of the European Court's free movement jurisprudence from 1974 to 2013. The analysis examines how frequently and under which circumstances the Court defers to national authorities. The results suggest that free movement law has substantially changed over the past four decades. The Court is leaving a growing range of decisions in the hands of national law-makers and judges, a trend that affects the level of scrutiny applied to Member State action, the division of powers between the European and national judiciary, and ultimately the nature of the internal market. The book argues that these new-found 'passive virtues' are linked to a series of broader political, constitutional, and institutional developments that have taken place in the EU.

Nein! Paddy Ashdown 2019-08-19 From bestselling and prize-winning author Paddy Ashdown, a revelatory new history of German opposition to Hitler. 'Ashdown has a great gift for narrative history. He unearths little known stories and places them in context with great dexterity. His new book throws fresh and important light on a crucial topic.' JONATHAN DIMBLEBY In his last days, Adolf Hitler raged in his bunker that he had been betrayed by his own people, defeated from the inside. In part, he was right. By 1945, his armies were being crushed on all fronts, his regime collapsing with many fleeing retribution for their crimes. Yet, even before the war started, there were Germans very high in Hitler's command committed to bringing about his death and defeat. Paddy Ashdown tells, for the first time, the story of those at the very top of Hitler's Germany who tried first to prevent the Second World War and then to deny Hitler victory. Based on newly released files, the repeated attempts of the plotters to warn the Allies about Hitler's plans are revealed. What is revealed is that the anti-Hitler bomb plots, which have received so much attention are, in fact only a small part of a much wider story; one in which those at the highest levels of the German state used every means possible - conspiracy, assassination, espionage - to ensure that, for the sake of the long-term reputation of their country and the survival of liberal and democratic values, Hitler could not be allowed to win the war. It is a matter of record that the European Union we have today and the nature and central position of Germany within it, is, in very large measure, the future envisaged by the plotters and for which they gave their lives.

Talent Chooses You James Ellis 2020-06-03 If you want your business to grow, you need to be able to rely on your ability to hire talent reliably and consistently. No talent pipeline? No growth, and no business. But your recruiting team is drowning (I asked them). They need help. Now, if you ask recruiters, they will ask for headcount. Or more technology. But more bodies and more tools won't solve the issue (though it will eat up your budget). What you need is a better strategy. And that strategy is called employer branding. Employer branding is about understanding, distilling and communicating what your company is all about in order to attract all the talent you need. That will differentiate your company as a place where people will want to work, rather than a place they land because they didn't know better. If you've heard about employer branding in business magazines, it might seem like something only "big companies" can do. Something that requires a dedicated team, expensive platforms, or a bunch of consultants. That isn't true. If you understand where your brand comes from, and how to apply it, any company (especially yours) can hire better with it. And this book will teach you how to do all of that, and then some. In this book, you'll learn what employer branding really is, how to make a compelling argument internally to leadership that creates commitment, how to work with other teams and be creative in finding solutions. As a special bonus, we are including a handbook on how to work with recruiting teams. This hands-on workbook is chock full of examples, checklists, step-by-step instructions and even emails you can copy and paste to make things happen immediately.

Mr. Humble and Dr. Butcher Brandy Schillace 2021-03-02 The mesmerizing biography of a brilliant and eccentric surgeon and his quest to transplant the human soul. In the early days of the Cold War, a spirit of desperate scientific rivalry birthed a different kind of space race: not the race to outer space that we all know, but a race to master the inner space of the human body. While surgeons on either side of the Iron Curtain competed to become the first to transplant

organs like the kidney and heart, a young American neurosurgeon had an even more ambitious thought: Why not transplant the brain? Dr. Robert White was a friend to two popes and a founder of the Vatican's Commission on Bioethics. He developed lifesaving neurosurgical techniques still used in hospitals today and was nominated for the Nobel Prize. But like Dr. Jekyll before him, Dr. White had another identity. In his lab, he was waging a battle against the limits of science, and against mortality itself—working to perfect a surgery that would allow the soul to live on after the human body had died. Mr. Humble and Dr. Butcher follows his decades-long quest into tangled matters of science, global politics, and faith, revealing the complex (and often murky) ethics of experimentation and remarkable innovations that today save patients from certain death. It's an enthralling tale that offers a window into our greatest fears and our greatest hopes—and the long, strange journey from science fiction to science fact.

Making Sense of Race in Education Jessica A. Heybach 2019-09-30 Making Sense of Race in Education: Practices for Change in Difficult Times takes a fresh look at the perennial issue of race in American schools. How do educators, in all settings, confront the issue of race with students and colleagues, given the contemporary backdrop of social movements for racial justice and change? How do educators affect change within their everyday classroom practices without fostering further alienation and discord? Although much has already been written about race and racism in school, this book addresses racial incidents directly and offers practical insights into how P-20 educators can transform these events alongside students and colleagues. Each chapter provides detailed analysis of curriculum, instruction, practices and pedagogical strategies for addressing race while at the same time wrestling with theoretical conceptions of race, justice, and fairness. Perfect for courses such as: Social Foundations of Education | Sociology of Education | Higher Education | Multicultural Education | Cultural Studies in Education | Schools and Society
