With large numbers of employees working in a network of domestic and foreign facilities, production processes are as varied as the products being produced. Incorporating comments and suggestions from managers who used the first edition of *Manufacturing Strategy*, John Miltenburg expands and improves on his focus in the areas of: International Manufacturing – where the focus is on a company's international network of factories; Competitive Strategy – where managers must understand the role manufacturing strategy plays in their company's business strategy; and Manufacturing Programs – showing how programs such as quality management, six sigma, agile manufacturing, and supply chain management fit within the manufacturing strategy. *Manufacturing Strategy* gives managers a common language for dealing with manufacturing problems at both strategic and operational levels.
