maternal-newborn nurses Accurate, readable, and up-to-date, Contemporary Maternal-Newborn Nursing presents pregnancy and childbirth as normal life processes with family members as co-participants in care. This text thoroughly illuminates all aspects of maternal-newborn nursing and many opportunities for nurses to make a difference in a changing healthcare environment. After introducing key concepts, it progresses through the steps of the nursing process, clearly delineating nurses' roles throughout pregnancy, labor, birth, the newborn period, and postpartum care. For each, it presents basic theory followed by chapters on assessment and care for essentially healthy women or infants, and then by complications and treatment. Recurring themes include evidence-based practice, critical thinking, clinical decision-making, community-based care, patient and family teaching, safety, cultural

care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and

guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients

and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

education; clinical reasoning; evidence-based practice, and developing cultural competence. This edition adds new Safety Alerts; more coverage of pain as the fifth vital sign; greater focus on care of families where a child is dying; and updated content on assessment, nutrition, communication, and many other key topics. Multiple pedagogical tools help students focus both learning and review, including intuitive Pathophysiology Illustrated visuals; Family Quotes presenting the family's perspective; Learning Outcomes and Critical Concept Review Features; Key Terms, and an online audio glossary.

Disease Control Priorities, Third Edition (Volume 2)
Robert Black 2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the

chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in

RMNCH can lessen the disparity in terms of both health and financial risk.

Saunders Q&A Review for the NCLEX-RN® Examination, 5th Edition provides the practice you need to succeed on the NCLEX-RN exam. To enhance your review, each question includes a test-taking strategy, rationales for correct and incorrect answers, and page references to major nursing textbooks. The companion Evolve website adds a pre-test to help in identifying any areas of weakness, and lets you answer questions in quiz, study, or exam mode. Written by NCLEX review expert Linda Anne Silvestri, this book organizes questions to match the Client Needs and Integrated Processes found in the most recent NCLEX-RN test plan. This review is part of the popular Saunders Pyramid to Success, which has helped more than 1.5 million nurses pass the NCLEX exam! A detailed test-taking strategy is included for each question, providing clues for analyzing and selecting the correct answer. Rationales are provided for both

correct and incorrect answer options. Questions categorized by Cognitive Level, Client Needs area, Integrated Process, and clinical content area help you focus on the question types you find most difficult. All alternate item format questions (multiple response, prioritizing, fill-in-the-blank, figure/illustration (hot spot), audio, video, and chart/exhibit) are included. Chapters organized by Client Needs simplify your review and reflect the question mix in the NCLEX-RN® test plan blueprint. A 85-question comprehensive exam represents the content and percentages of question types identified in the NCLEX-RN test plan. Preparation for your NCLEX-RN review includes chapters on nonacademic preparation, test-taking strategies, the CAT format, and a view of the NCLEX-RN from a new graduate's perspective. Page references to Elsevier textbooks direct you to remediation material for any question answered
