*"If Each Comes Halfway"* Kathryn S. March 2018-08-06 For twenty-five years, Kathryn S. March has collected the life stories of the women of a Buddhist Tamang farming community in Nepal. In "If Each Comes Halfway", she shows the process by which she and Tamang women reached across their cultural differences to find common ground. March allows the women's own words to paint a vivid portrait of their highland home. Because Tamang women frequently told their stories by singing poetic songs in the middle of their conversations with March, each book includes a CD of traditional songs not recorded elsewhere. Striking photographs of the Tamang people accent the book's written accounts and the CD's musical examples. In conversation and song, the Tamang open their sem—their "hearts-and-minds"—as they address a broad range of topics: life in extended households, women's property issues, wage employment and out-migration, sexism, and troubled relations with other ethnic groups. Young women reflect on uncertainties. Middle-aged women discuss obligations. Older women speak poignantly, and bluntly, about weariness and waiting to die. The goal of March's approach to ethnography is to place Tamang women in control of how their stories are told and allow an unusually intimate glimpse into their world.

Confessions of a Cafeteria Catholic Richard Phillips 2012-05 The thoughts contained here have more to do with me and my own perspective of life than the perspective of any one established religious institution, Catholic or otherwise. That is perhaps the goal of all men and women who strive to find themselves and their God while facing the joys and challenges of life, trying to find the faith that keeps them on the path of discovering who they are and what they believe. If we are true to our faith, whatever that faith is, the most important thing is to listen to God, to His revealed message for us personally. God speaks to each of us personally, uniquely, speaking to our own needs. These essays are intended to help open your mind to the possibility of asking

questions, not about the veracity of the revealed Word of the Scriptures, but about how we see our relationship with God and how we find our way home. I hope you will find this a useful tool in your own attempt at finding your path.

**Kohonen Maps** E. Oja 1999-07-02 The Self-Organizing Map, or Kohonen Map, is one of the most widely used neural network algorithms, with thousands of applications covered in the literature. Currently this method has been included in a large number of commercial and public domain software packages. In this book, top experts on the SOM method take a look at the state of the art and the future of this computing paradigm. The 30 chapters of this book cover the current status

of SOM theory, such as connections of SOM to clustering, classification, probabilistic models, and energy functions. Many applications of the SOM are given, with data mining and exploratory data analysis the central topic, applied to large databases of financial data, medical data, free-form text documents, digital images, speech, and process measurements. Biological models related to the SOM are also discussed.
