**Viewing and Imaging the Solar System** Jane Clark  
2014-09-24 Viewing and Imaging the Solar System: A Guide for Amateur Astronomers is for those who want to develop their ability to observe and image Solar System objects, including the planets and moons, the Sun, and comets and asteroids. They might be beginners, or they may have already owned and used an astronomical telescope for a year or more. Newcomers are almost always wowed by sights such as the rings of Saturn and the moons of Jupiter, but have little idea how to find these objects for themselves (with the obvious exceptions of the Sun and Moon). They also need guidance about what equipment, besides a telescope, they will need. This book is written by an expert on the Solar System, who has had a lot of experience with outreach programs, which teach others how to make the most of relatively simple and low-cost equipment. That does not mean that this book is not for serious amateurs. On the contrary, it is designed to show amateur astronomers, in a relatively light-hearted—and math-free way—how to become serious.

## **A Practical Guide to Information Architecture**

Donna Spencer 2010-12

*Goldilocks* Jeanne Willis 2019-02 Everyone loves Goldilocks' hilarious online videos, but in her quest to get more likes, more laughs and more hits, she tries something a little more daring: stealing porridge #pipinghot, breaking chairs #fun, and

using someone else's bed #sleep. What will Daddy Bear do when he sees that online? A hilarious cautionary tale for a new generation of internet-users from the prize-winning partnership of Jeanne Willis and Tony Ross.

*Indistractable* Nir Eyal 2020 Reveals the hidden psychology driving you to distraction. Empowering and optimistic, this is the book that will help you design your time, realise your ambitions, and live the life you really want.

*Grouped* Paul Adams 2011-11-22 The web is undergoing a fundamental change. It is moving away from its current structure of documents and pages linked together, and towards a new structure that is built around people. This is a profound change that will affect how we create business strategy, design, marketing, and advertising. The reason for this shift is simple. For tens of thousands of years we've been social animals. The web, which is only 20 years old, is simply catching up with offline life. From travel to news to commerce, smart businesses are reorienting their efforts around people—around the social behavior of their customers and potential customers. In order to be successful, businesses will need to understand how people are connected, how their social network influences them, how the people closest to them influence them the most, and how it's more important for marketers to focus on small, connected groups of friends rather than looking for overly influential individuals. This book pulls together the

latest research from leading universities and technology companies to describe how people are connected, and how ideas and brand messages spread through social networks. It shows readers how to rebuild their business around social behavior, and create products that people tell their friends about.

**Invasion of Privacy** Ian Sutherland 2015 Your private life is streamed live to a global audience. But no one told you about the cameras hidden in your home. And now a killer is watching, learning, planning . . . The brutal murder of a beautiful young cellist has stumped DI Jenny Price. How did the killer know the victim's most intimate dreams to lure her so convincingly to her death. Out of leads, Jenny reluctantly accepts the aid of antisocial but attractive witness Brody Taylor, who has come forward with a bizarre theory about hidden webcams broadcasting online from thousands of homes across the country. But Jenny is unaware that the charming Brody is under cover on his own covert operation. An up-to-the-minute crime thriller that exposes the dark side of life online. **WHAT OTHERS SAY ABOUT INVASION OF PRIVACY:** "I am a little sad it is over but still buzzing from the superb finale. Looking forward to the next adventure." "Sutherland deftly weaves dramatic, humanly plausible police procedurals with very high-level hackery to form a novel both intricately plotted and meticulously produced." "One of the best debut novels I have read. Crime, murder, sex, friendship, twist and turns, highs and lows are abundant throughout this book." "If the producers of *Homeland* or *24* are looking for the next, and very relevant, topical and addictive series, look no further."

**Troll Stinks** Jeanne Willis 2017-04-01 Billy Goat and his best friend Cyril are messing about with the farmer's mobile phone, taking selfies and playing games . . . until they find the number for a troll. Their Grandpa Gruff says trolls are bad, so Billy and Cyril decide to get their own back by sending mean messages. After all, trolls really do stink! Don't they?

#### **Automated Peritoneal Dialysis** Claudio Ronco

1999-01-01 While continuous ambulatory peritoneal dialysis (CAPD) has been the standard peritoneal procedure since the seventies, different schedules of automated peritoneal dialysis (APD) have emerged during the eighties. Today, APD is considered a valuable tool in the management of ESRD patients, together with CAPD and hemodialysis. However, despite its frequent use, APD has not yet been well assessed, and most pathophysiological and clinical studies on PD refer to CAPD. In this book, major experts in the field therefore discuss and evaluate the insights gained on APD up to now, presenting a comprehensive review of all experimental, technical and clinical aspects related to the various

treatments grouped under the definition of APD. The recent developments presented are divided into four sections: membrane permeability, transport mechanisms and kinetic modeling applied to APD; prescription and adequacy of different APD treatment schedules; dialysis machines and solutions for APD, and, lastly, different clinical aspects such as the possibility to maintain APD program and residual renal function. Physicians involved in ESRD care, renal fellows and scientists both in the academic world and in the hospital setting will undoubtedly profit from this timely publication.

#### **The Fourth Industrial Revolution** Klaus Schwab

2017-01-03 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

#### *Customer-Driven Transformation* Joe Heapy

2018-07-03 Service design is the activity of utilizing resources and people to build and sustain services that not only meet customers' needs, but also add that little bit of magic or true competitive advantage. In an overcrowded marketplace there is often little opportunity to break away from the pack and influence customer perceptions; *Customer-Driven Transformation* demonstrates how to use

design thinking as a driver for organizational change to translate your vision into compelling services that will delight your customers. How did companies like Netflix, Airbnb and Uber revolutionize industries and win loyal followers? They started here. By thinking about what customers need foremost, you can reinvent your value proposition and deliver services that work. Customer-Driven Transformation shows how to instill an outside-in approach to strategy, moving away from management that's technology, marketing or resource optimization-led, towards being customer-inspired and experimental with innovation. It is a practical guide for any business to lead a transformational programme and use design thinking to change how services are created, ensuring they are expertly designed, elegant in use and advance in customer-mindedness. With ground-breaking case studies from the likes of E.ON Energy, Hyundai Motor Company and Bupa, this cutting-edge book will empower companies to take control of customer experience and deliver long-lasting and impactful change. Focusing on one of the hottest management topics, it is an inspiring read for any business leader to understand how to reinvent their value proposition, gain market share and win customers.

##### *Circular Business Models in the Mobile Phone*

*Industry* David Watson 2017-11-30 The circular

economy offer opportunities to reduce resource use and waste whilst providing business opportunities. This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence. The emergence of the smart phone has changed the landscape, making repair, refurbishment and resell attractive to businesses and consumers. Moreover, emerging modular phone design should allow functional upgrades with low resource wastage. This report investigates the adoption of circular business models within Nordic markets. Producers, retailers, refurbishers, recyclers and resellers tell of their motivation, experiences and the challenges that they face. A special look is taken at consumer and waste law and the challenges and opportunities they represent. The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector.

**The Justified Tight B\*\*\*\*rd's Guide to Life** P.J. Moore 2014-05-28 The Justified Tight B\*\*\*\*rd's Guide to Life is a book of down-to-earth, no-nonsense, everyday financial advice written and presented with curmudgeonly black humour in the style of Victor Meldrew from One Foot in the Grave. Taking a lateral and critically reflective look at some of our modern consumer and lifestyle choices, it aims to provide all readers, regardless of income, with the key to modest financial wellbeing. The book challenges the arguments of those who claim that we are on the brink of a financial abyss akin to the great 1930s depression. P. J. suggests that, for all our difficulties, we all have enough money, either from employment or social welfare, to live at the very least in modest comfort. P. J. examines some of our perceived financial woes from an holistic rather than a purely economic viewpoint and demonstrates how these problems may be dealt with by a simple shift in perspective. The book also suggests that many purchases we make every day are not only unnecessary, but actually counterproductive or damaging in some way, therefore offering the reader a justified reason for not purchasing many of the items we often consider to be essential. The Justified Tight B\*\*\*\*rd's Guide to Life is presented in four separate sections, containing over 300 points. Each point is a self-contained money saving tip linked to the others

in the section. Dispensing with political correctness and urging a return to independent thinking, the book challenges the population to take an honest, rounded, responsible and wholesome approach to the problems they encounter and how they resolve them. The book will be of help to anyone who would like to cut their expenses or household outgoings. It is also a self-help book that challenges the reader to ask themselves what they really want from life, and what their priorities are. It should spark critical reflection of our spending habits in all.

**Digital Britain** Great Britain: Department for Culture, Media and Sport 2009-06-16 In this document the Government sets out a programme of action designed to position the UK as a long-term leader in communications, creating an industrial framework that will fully harness digital technology. The UK's digital dividend will transform the way business operates, enhance the delivery of public services, stimulate communications infrastructure ready for next-generation distribution and preserve Britain's status as a global hub for media and entertainment. This approach seeks to maximise the digital opportunities for all citizens. The report contains: (1) an analysis of the levels of digital participation, skills and access needed for the digital future, with a plan for increasing participation, and more coherent public structures to deal with it; (2) an analysis of communications infrastructure capabilities; (3) plans for the future growth of creative industries, proposals for a legal and regulatory framework for intellectual property and proposals on skills and investment support and innovation; (4) a restatement of the need for specific market intervention in the UK content market, with implications and challenges for the BBC and C4 Corporation and other forms of independent and suitably funded news; (5) an analysis of the skills, research and training markets, and what supply side issues need addressing for a fully functioning digital economy; (6) a framework for digital security and digital safety at international and national levels and recognition that a world of high speed connectivity needs a digital framework not an analogue one; (7) a review of what all of this means for the Government and how digital governance in the information age demands new

structures, new safeguards, and new data management, access and transparency rules.

**Business Transformation Essentials** Dr Axel Uhl  
2013-09-28 Transformation programs are an

increasing feature of global companies carrying out major change projects with high strategic relevance. These programs combine business and technical content bringing together management and information systems. Regardless of their form, they can deliver real benefits to an organization's bottom line. On the other hand, however, one needs to remember that such complex endeavours are always affiliated with extensive interventions within the organization's business model, organizational structure, business processes, and enterprise architecture. Not every organization is aware that this kind of interferences has also a significant influence on the corporate vision, strategy, culture, values, and even the entire value chain - elements on which an organization's long-term success strongly depends. Despite the frequency and major significance of such transformations, managers rate the competencies of their companies rather poorly in this respect. Consequently, the success rate of business transformation projects is correspondingly low. Since 2011, the Business Transformation Academy (BTA), an interdisciplinary think tank for the topic of business transformation management, has been publishing related articles and case studies in its quarterly journal '360° - the Business Transformation Journal'. The core focus of BTA's publications lies in the creation of knowledge on how to manage challenging business transformation projects. Every publication describes and explains the fundamental issues that plague business transformation programs, as well as the strategies which organizations should embrace to overcome them. Using a variety of case studies including: Allianz SE, Shell, SAP, Vodafone, and Mercedes-Benz, this book provides unprecedented insights into characteristics of current transformation programs and the potential that can be leveraged by applying a holistic transformation management approach. In this book, the BTA has selected only its most essential readings. Each article and case study includes timeless advice that will be relevant

regardless of the ever-changing business environment.

*eMarketing eXcellence* PR Smith 2012-10-12 'eMarketing eXcellence' offers an exciting new approach to help you build a customer-driven e-business. As the core text for the CIM's E-marketing award, the book offers a highly structured and accessible guide to a critical subject, providing a useful reference point for all students and managers involved in marketing strategy and implementation. A practical guide to creating and

executing e-marketing plans, this book combines established approaches to marketing planning with the creative use of new e-models and e-tools. It is designed to support both marketers who are integrating e-marketing into their existing marketing and communications strategies and experienced e-marketers looking to optimise their e-marketing. The book shows how to:

- Draw up an outline e-marketing plan
- Evaluate and apply e-marketing principles & models
- Integrate online and offline communications
- Implement customer-driven e-marketing
- Reduce costly trial and error
- Measure and enhance your e-marketing
- Drive your e-business forward

As the core text for the CIM's new professional E-marketing Award, it provides comprehensive, critical coverage of the key areas of e-marketing planning for marketing professionals. Established marketing concepts such as customer relationship management, the marketing mix and the widely adopted SOSTAC® planning system, are re-examined in the new media context - and new approaches are defined, including business models, traffic building and web site design.

**Geographic Citizen Science Design** Artemis Skarlatidou 2021-02-04 Little did Isaac Newton, Charles Darwin and other 'gentlemen scientists' know, when they were making their scientific discoveries, that some centuries later they would inspire a new field of scientific practice and innovation, called citizen science. The current growth and availability of citizen science projects and relevant applications to support citizen involvement is massive; every citizen has an

opportunity to become a scientist and contribute to a scientific discipline, without having any professional qualifications. With geographic interfaces being the common approach to support collection, analysis and dissemination of data contributed by participants, 'geographic citizen science' is being approached from different angles. Geographic Citizen Science Design takes an anthropological and Human-Computer Interaction (HCI) stance to provide the theoretical and methodological foundations to support the design, development and evaluation of citizen science projects and their user-friendly applications. Through a careful selection of case studies in the urban and non-urban contexts of the Global North and South, the chapters provide insights into the design and interaction barriers, as well as on the lessons learned from the engagement of a diverse set of participants; for example, literate and non-literate people with a range of technical skills, and with different cultural backgrounds. Looking at the field through the lenses of specific case studies, the book captures the current state of the art in research and development of geographic citizen science and provides critical insight to inform technological innovation and future research in this area.
